

THE CAREER CATALYST PROGRAM

At Champlain, we are unapologetically career focused. We take your investment in a Champlain education very seriously and want to ensure it's a prudent one. That's why we provide access to our one-of-a-kind, nationally recognized career development and personal finance program—InSight—from the minute you step on our campus. Our graduates tell us InSight is one of the most valuable parts of a Champlain education, so we want to make sure you experience its unique advantages.

Get a Firsthand Student Perspective

Talk with a Career Peer Coach when you visit.

There is no better way to understand the value of Champlain's unique InSight Program than to experience it for yourself and hear from the students who work as coaches. When you visit, you will have the opportunity to speak one-on-one with a Career Peer Coach; they can provide you with a student's perspective on the value of the career and personal finance education they receive through InSight.

Early Access To Exclusive Networking Events

Submit your enrollment deposit and unlock the door to exclusive workshops and events.

Champlain's comprehensive approach to professional readiness is provided through the Career Collaborative—home of the InSight program. The Career Collaborative hosts a series of professional networking workshops and events on campus and throughout the country. When you enroll at Champlain, you gain advance access to these valuable networking experiences—Early Decision students can already begin participating in January!

Meet Your Career Coach

Begin working with your personal Career Coach once you deposit.

Every student at Champlain is assigned a professional Career Coach. Starting when you make your enrollment official at Champlain by submitting your deposit, you will have the opportunity to meet with your Career Coach—either in person or virtually—to discuss your goals and start identifying potential career options.

Get a Jump-Start On Your InSight Milestones

Enroll Early Decision, and get access to an online InSight course.

Each year, our students complete a series of required milestones for InSight focused in two key areas we call "tracks": the Career Positioning Track and the Personal Finance Track. As an Early Decision student, you can get a head start on these milestones by taking an online InSight course the summer before you start at Champlain. As an added benefit, you'll get to virtually meet some of your fellow classmates.

Career Support After Graduation

Receive ongoing professional support throughout your career—at no cost!

Our InSight program provides you with the knowledge and experience you need to enter your professional life, but it doesn't stop there: As a Champlain graduate, you'll have access to our career support throughout your career, at no extra cost! This includes support in networking, one on one coaching with professional staff, and access to information on professional conferences nationwide.

Families can benefit from InSight, too!

We often hear from parents and family of students that they wish they'd had InSight when they were younger. Well, better late than never! When we welcome your student to the Champlain community, we welcome you, too—and that includes making special InSight-related services and events available to you.
