Common Interview Questions for Computer Networking and Information Security Majors

Interviewing with companies for IT positions, whether large or small, has a variety of approaches and timelines in the hiring process. Generally speaking, larger firms have a more formal interview process involving a selection committee who conducts phone interviews, having a video web chat online, and one or more site visits. Smaller firms may have a more streamlined approach resulting in a quick phone interview with their recruiter followed by an interview on site. Most of the questions you will be asked are geared towards your technological proficiency some will be inquiring about your personality.

What questions can I expect as a CNIS Major?

- Tell us a little about yourself.
- Aside from taking courses, what sorts of things have you done to become better qualified for your pursuits as an IT Professional?
- Have you worked with building and maintaining networks? In which area of networking do you consider yourself most competent and why?
- Give two examples of things you've done on the job or in school that demonstrate your willingness to work hard.
- What is the most difficult task you have performed or learned about with group policy with a Windows Server?
- It is very important to build good relationships on the job, but sometimes it doesn't always work out. If you can, tell me about a time when you were not able to build a successful relationship with a difficult person.
- What are three characteristics of a good manager?
- Tell us about a time when you took responsibility for an error/mistake and were held personally accountable.
- What do you know about our company and why are you interested in working/interning with us?
- What has been your most challenging course in college? Why?
- What is the extent of your web application development experience?
- What makes you a good IT professional?
- What specific automated tools have you used to recover deleted files?
- When solving a problem, tell me about the steps you go through to ensure your decisions are correct / effective.
- Which do you prefer, Windows, Mac, or Linux and why?
- What are you most proud of?
- What are your best qualities when looking at your job experience?
- Do you have any questions for us?
Common Interview Questions

Examples:
- Please tell me about yourself.
- What makes you interested in this position?
- What do you know about our organization?
- What do you consider your greatest strengths?
- What would former coworkers/professors/supervisors say about you if we called them as a reference?
- Why did you choose this field?
- How did your college experience prepare you for a career in this field?
- Describe the work environment that makes you thrive.

More Examples:
- If you have ever dealt with difficult people, how did you manage conflict?
- What are your proven coping mechanisms in challenging times?
- If creative, where do you get your inspiration?
- Convince me you are the perfect match for our opening.
- How does your previous experience relate to the job we have open?
- How did you get along with your last boss?
- What is the hardest job you’ve ever held?
- Do you have any questions for us?

13 Things To Know For a CNIS/Administration Professional Interview.
1. What is MTU?
2. What is a VPN?
3. What is a VLAN?
4. What is a metric?
5. What is ARP/RARP?
6. What is a default route?
7. What is a MAC address?
8. What is a broadcast storm?
9. What is the purpose of VRRP?
10. What is a runt, Giant, and collision?
11. Describe a TCP connection sequence.
12. What is the difference between TCP and UDP?
13. What is the difference between a hub, switch, and router?

Top 10 Things to Consider for the Interview
- An interview is a conversation about what you can do for them; research the company and tailor your responses towards substantiating how your talents and personality match the position.
- Rehearse interview questions out loud with a friend, family member, or your Career Advisor.
- Arrive at least 15 minutes early, but enter the premises 8–10 minutes early.
- Bring copies of your resume and reference sheet with you to offer.
- Use professional language and avoid slang words such as “uh,” “um,” “you know,” and “like.”
- Body language should be professional: good posture, not slouched, good eye contact but not staring. Watch the nervous habits of twirling hair, tapping a foot, or drumming fingers.
- Smile. It’ll help you ---and them--- relax!
- Be prepared to offer evidence through detailed examples of times and ways and situations you used certain technical applications, characteristics, or skills.
- Collect their business cards so you can follow up with a thank you card or e-mail.
- After the interview, take notes on everything you can remember and use the experience to further develop your interview techniques.
Questions to Consider Asking the Interviewer

Adapted from this great resource: “Three Questions to Ask” by Toni Bowers, 2009

So many people are concerned with making a good impression during a job interview that they forget it’s a two-way street. You’re there not only to market yourself but to find out if the job and the company are a good fit for you. You should use the interview to ask questions for yourself. So what type of questions should you be asking? Here are a few:

What’s an average day like here?
The question may prompt the interviewer to go into great detail about the day-to-day workings of the company, which is great information to have. If you deem it appropriate, respond to their answer with an example of how their work environment suits your style of operation.

How would you describe the culture here?
The interviewer may answer that it’s pretty laid-back or it’s all business, or there’s a good mixture of gender and cultures. Of course, he may also lie through his teeth, but if you’re any good at reading people even that might be valuable.

What qualities are you looking for in the person who fills this position?
You’re looking for answers like “Someone who is good with details” or “Someone who can communicate technical issues to end-users,” etc. If the answer is “Someone who doesn’t mind skipping lunch or always being on call,” then you have some solid information on which to base your decision about the job.

Other questions to consider asking:

- What is the next step in the hiring process? Or, when might you make a hiring decision?
- What tools/applications/languages do you use?
- What is your history with student interns/employees?
- What typical projects or tasks do student interns work on?
- What makes a student intern successful? What traits are best suited for your company?
- How do the various members of the team work together—who is in charge? etc.
- How would successful performance in this position be measured?
- Is there much turnover in your company?
- What’s the management style?
- Do entry-level employees get to travel to conferences? Is that a perk or are they on their own?
- What makes new college grads attractive; what should students be working on?

Top 10 personal values employers seek in employees:

- Honesty/Integrity
- Adaptability/Flexibility
- Dedication/Tenacity
- Reliability/Responsibility
- Loyalty
- Positive Attitude/Motivation
- Professionalism
- Self-Confidence
- Self-Motivated
- Willingness to Learn

How to Handle the Hardest Questions

Now and then we find ourselves in interviews getting completely stumped or we mentally ‘kick’ ourselves for how we responded to a particular question after the interview. These things happen. We’re just people being people in what often feels to be a socially-awkward experience commonly referred to as an interview. So how do we make the most of responding to the hardest questions?

We Practice. Make a commitment to treat the interview process with the respect it deserves and you will find that after enough "on and off camera" attempts:

- Your confidence will grow
- Your responses with gain clarity and charm
- Your questions for the interviewer will mature
- And you’ll experience the awesome “feel good” moment after a successful interview

➤ Q and A: Tough Questions and Great Answers
Adapted from: "Ten Tough Interview Questions and Ten Great Answers," 2010 CollegeGrad.com

1. **Tell me about yourself.**
   What the hiring manager really wants is a quick, two- to three-minute snapshot of who you are and why you’re the best candidate for this position. Talk about what you’ve done to prepare yourself to be the very best candidate for the position. Use an example or two to back it up. Tell me about yourself does not mean tell me everything. Just tell me what makes you the best. Remember, you aren’t just a tech guru who is surrounded by monitors; you are a person as well so don’t forget to add a bit of personality to it as well.

2. **Have you ever had a conflict with a boss or professor? How was it resolved?**
   Note that if you say no, most interviewers will keep drilling deeper to find a conflict. Focus your answer on the behavioral process for resolving the conflict and working collaboratively. For example: Yes, I have had conflicts in the past. Never major ones, but there have been disagreements that needed to be resolved. I’ve found that when conflict occurs, it helps to fully understand the other person’s perspective, so I take time to listen to their point of view, and then I seek to work out a collaborative solution. For example . . .

3. **What is your greatest weakness?**
   Most career books tell you to select a strength and present it as a weakness. Such as: I work too much. I just work and work and work. Wrong. First of all, using a strength and presenting it as a weakness is deceiving. Second, it misses the point of the question. You should select a weakness that you have been actively working to overcome. For example: I have had trouble in the past with planning and prioritization. However, I’m now taking steps to correct this. I just started using a pocket planner; then show them your planner and how you are using it. Talk about a true weakness and show what you are doing to overcome it.

In reviewing these responses, please remember that they are only to be viewed samples. Please do not rehearse them verbatim or adopt them as your own. They are meant to stir your creative juices and get you thinking about how to properly answer the broader range of questions that you will face.
Preparing for an Interview

The interview, whether in person, online, or over the phone, is the context where you communicate your full spectrum of skills as a candidate to an employer. Interviews give you the chance to describe how your talents and personality fit the needs of the position. Hiring managers and selection committees rely heavily on interview outcomes when deciding whether or not to extend an offer.

The keys to a successful interview are preparation, practice and presentation.

➢ Preparation:
Research your employer thoroughly, refine your resume, select appropriate attire, create a list of questions to ask the employer, and get a good night's sleep (It’s more important than you might think). Also be sure to familiarize yourself with the interview’s location. Also make sure you take care of your hygiene. Brush your teeth, floss, if you are a man and are scruffy shave! If you have a beard, trim it make it look neat and clean. Don’t ever chew gum during the interview. Bring a portfolio with you which has copies of your resume, a pad of paper to take notes on and a pen and pencil. It is always good to have multiple writing implements with you so that 1. You don’t have to borrow one and 2. If your pen dies you have a backup, ad 3 if they forget one you can come to the rescue. This portfolio is a good place to have questions that you would like to ask. Or key points that you have written down which can act as reminders for speaking points.

➢ Practice:
Set up a “mock interview” with Career Services, a friend, family member, or colleague, and browse our selection of interview questions. Rehearsing your responses is a great way to boost your confidence and craft how you communicate your talents and personality.

➢ Presentation:
When answering questions, remember the “3 P’s”
- **Ponder**: take a moment to reflect on why the employer has asked a question. This will help with framing your response and speak to the skill set, value, or ability being measured.
- **Prove**: if you say that you have developed excellent organizational skills give specific examples of situations where you demonstrated a high level of organization.
- **Project**: always be genuine and confident in responding to questions, asking questions, and meeting new people during the interview.
