

Analysis of Champlain College's Copy Paper 2006-2018

Observations from FY2018 Analysis:

1. (+) We are using significantly less paper than 2006 (56% less) and 18% less than last year. This is likely attributed to further electrifying of processes and increased use of Canvas for classes.
2. (-) Our amount of non-recycled content paper took an uptick by 13%. This results in additional costs, as our best price for standard copy paper are the 30% recycled-content offerings.
3. (+) Our overall costs decreased 16% this year, and by 52% compared to costs in 2006.
