# Different by Design

**Since 1878, we've been preparing students to be ready for work, ready for life, ready for anything through our distinctive approach to education. Champlain College offers unmatched opportunities for academic, professional, and personal growth.**

We do things differently and we do them with purpose. The first difference you'll notice is our majors: They are career focused and reflect the most promising professional fields. Our market driven curriculum is centered on real world experience our extensive internships take you out into the field, and our international programs take you out into the world.

Read on to learn how our hands on academics deliver one of the most comprehensive, useful educations available today one that our current students appreciate and that launches our graduates into career success. Ninety one percent of graduates over the last six years were employed or continuing their education within six months after graduating.

Champlain's innovative academics and rigorous career focus will take you further than you ever imagined you could go and faster than you could believe possible. Our graduates are in high demand in the job market, and you will be too.

# Learn what you love.

A woman with dark hair, wearing a bright red turtleneck sweater and black pants with a red and white striped side stripe, stands in a room. The room's walls are covered with various posters, including one for 'COURT', one for '20,000 DAYS ON EARTH', and one for 'WRONG'. A large, glowing yellow spherical light fixture hangs from the ceiling. In the foreground, the back of a man's head and shoulders is visible on the left side.

Core Curriculum

InSight Program

# **Start sooner. Go further.**

**Our Upside-Down Curriculum allows you to dive into your major in your very first semester.**

You'll be qualified sooner for meaningful internships that can inform or redirect your career path. Because when you engage with your career from day one, you'll be leaps and bounds ahead come graduation day.

After four years of deep exploration in your field, you'll be up to date on current issues, fluent in best practices, and familiar with the impact of your work within the community and the world.

## **DIFFERENT BY DESIGN:**

Career-Focused Majors  
Upside-Down Curriculum

→ **Core Curriculum**  
InSight Program

# We don't call it general education, because it's specific.

**The Core curriculum is intentionally focused on building skills such as critical thinking, inquiry, and communication—the skills you'll rely on throughout your life.**

It's a four-year liberal arts course sequence that prepares you to be a global citizen and entrepreneurial problem solver.

Instead of checking off boxes to meet general education requirements, you'll collaborate with classmates and professors on fascinating research and projects. There are no exams or long lectures in the Core and nothing to memorize, though your classes will certainly be memorable. You'll read, research, write, and take action in the community.

The knowledge and abilities you develop over four years in the Core curriculum will prime your mind to handle the inevitable complexities and changes you'll face as you live a life beyond Champlain College.

**“ Instead of taking the gen-eds that other schools require, I was able to choose socially conscious topics that really spoke to me for my Core classes.”**

**Emma Worthge // Creative Media**

**“ Since day one, Champlain College has prepared me for the real world outside of the classroom. You learn about personal finances and career readiness right away, which got me thinking about how I will navigate independently after graduation.”**

**Lauren Materia // Communication**

## **DIFFERENT BY DESIGN:**

Career-Focused Majors  
Upside-Down Curriculum  
Core Curriculum

# Insight to last your whole life.

## **What you need to be ready for anything.**

How do you create a budget that works for your salary and your student loans—and where does your credit score come in? What will help you land your dream job in a competitive market? What's a reasonable work/life balance, and how do you achieve it?

At Champlain, you'll learn personal finance, wellness, and career-positioning skills that will help you build a healthy and successful future.

You're more than a student now, and you'll be more than your career after graduation. We'll help you prepare for all of it.

---

Champlain College  
is recognized by *U.S.  
News & World Report*  
for "Best Undergraduate  
Teaching" in 2022.

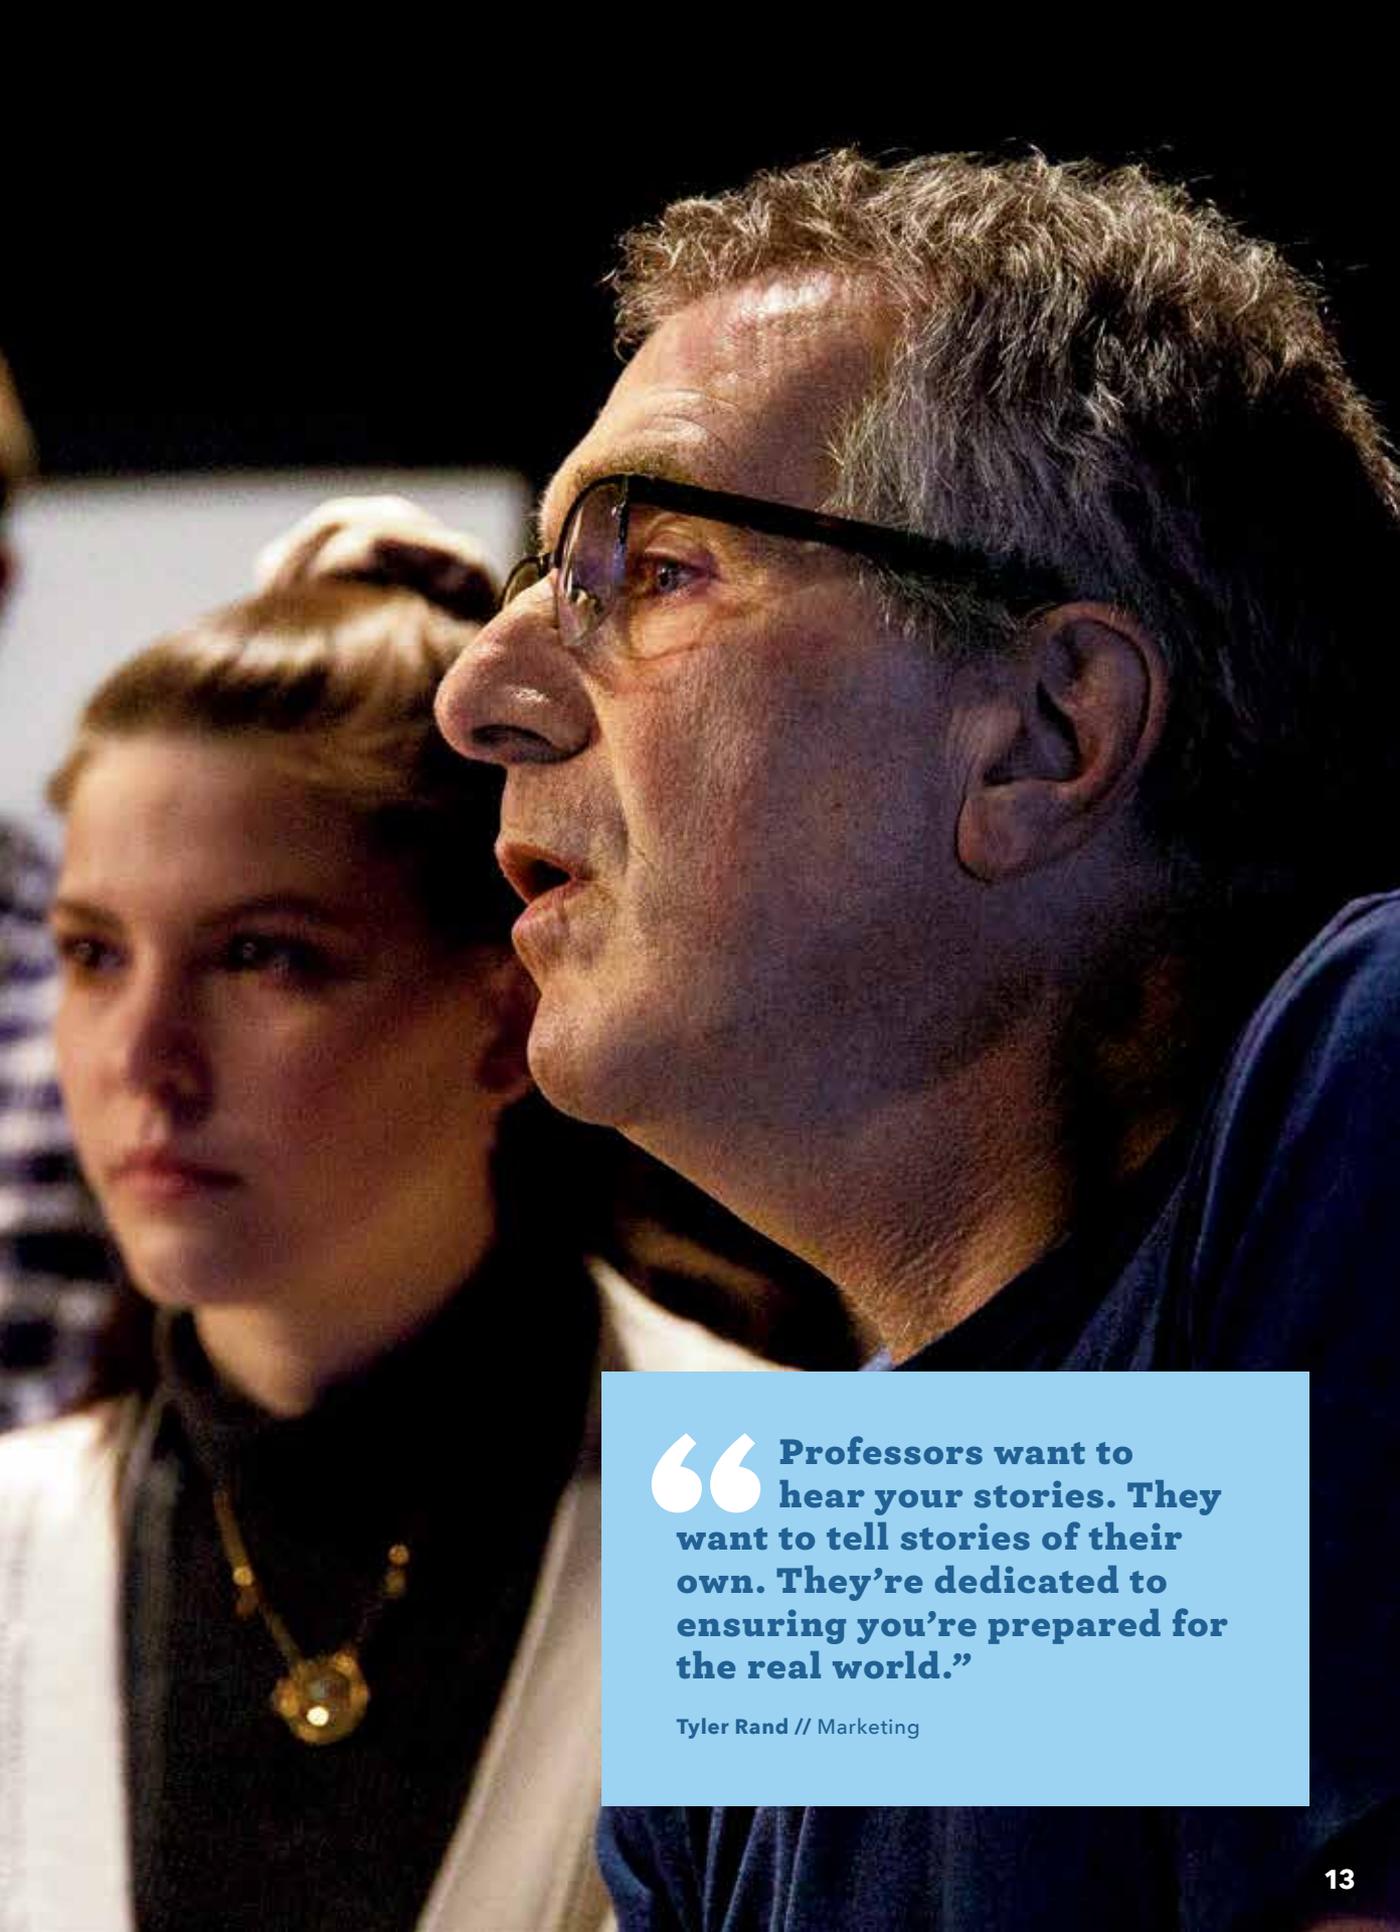

# Our faculty practice what they teach.

Work side by side with leaders in your field, gaining industry insights all the while. Your professors will know your name by the end of the first week and use it to say hello in the hallways. Soon they'll be recommending you for internships with their industry contacts.

With an average class size of 14, you won't be lost at the back of a lecture hall. Your classes will have you participating in animated discussions, collaborating on projects, and investigating every question.

Our faculty go above and beyond excellent teaching. They're former and current practitioners in their fields, and they can't wait for you to join them.

**“ Professors want to hear your stories. They want to tell stories of their own. They’re dedicated to ensuring you’re prepared for the real world.”**

# BUSINESS MAJORS

## Impact more than the bottom line.

In the Robert P. Stiller School of Business, you'll help shape a **new era of business** being ushered in by companies of all sizes and industries around the world one that recognizes that **better business** goes hand in hand with **nurturing better beings**. Our expert faculty are dedicated to preparing students to become global citizens, capable of identifying opportunities to apply brilliant business practices, entrepreneurship, and innovative efficiencies in unexpected ways. And because they don't just study their areas of expertise but contribute to their fields as active practitioners, our faculty are a powerful tool for interviews, travel grants, internships, networking contacts, and funding opportunities. They'll help you pursue whatever it is that develops a better, business minded version of you.

[champlain.edu/  
accounting](https://champlain.edu/accounting)

#### **3-YEAR DEGREE:**

With a minimum 3.0 GPA and a lot of ambition, you can graduate with an Accounting degree in **just three years**. In our Accelerated Accounting program, you'll take two full summer semesters so you can launch your career early.

#### **DOUBLE MAJOR:**

Our double major in Accounting and Finance provides the expertise—and the 150 academic credits—you'll need for CPA licensure.

#### **4+1:**

Working with your Faculty Advisor, you can complete a 3+1 or 4+1 program to top off your undergraduate studies with an MBA.

# Accounting

Become fluent in the language of business.

Accounting is the link that connects all businesses, and our Accounting major gives you the versatility you need to work in any industry you choose.

Designed to produce business and industry leaders, this program goes beyond typical accounting practices to teach you how to strategize effectively for any type of enterprise or organization.

As you learn new concepts and tools, you'll immediately put them to use. Your early accounting and interdisciplinary business courses set you up perfectly for impressive internship work and other field-based learning opportunities—you'll distinguish yourself from the competition early on.

Our close-knit alumni network will be a great career resource, and you'll be part of a family of well-connected business leaders locally and nationally.

“At the end of my internship with KPMG, I was offered a full-time job post-graduation! I don't think I would have had the opportunity to work for a Big Four accounting firm if I hadn't landed the internship.”

**Caitlin Dangvu** // Accounting and Finance

# Business Administration

champlain.edu/  
bsba

Customize your business degree for the career—or more likely, careers—you’ll hold over your lifetime.

The BS in Business Administration is a future-proof degree, designed to address and evolve with the changing skills, needs, and values that employers are looking for today (and tomorrow). A variety of concentrations give you the flexibility to customize and apply them to your interests and career goals. Considering starting your own business or nonprofit organization? We’ve got a concentration for that. Thinking about ways to improve the nature in which business is done? We’ve got you covered, too.

Starting in your first semester, you’ll learn by doing alongside your classmates to explore how businesses function from the inside out. Through project-based classes, real consultative client work, internships at home and abroad, and an engaging senior Capstone project, you’ll graduate with a one-of-a-kind toolkit (and the right credentials) to take on your field at full speed.

This combination of rigorous business education, intensive, practical experience, and focused application deliver transferable skills that will last a lifetime, while setting you up to pursue what gives you meaning in life.

## 96%

of our Business Administration graduates over the last six years were employed or continuing their education just six months after graduation.

champlain.edu/  
finance

# Finance

Manage a portion of Champlain's endowment using the same investment tools and datasets as those on Wall Street.

## WHERE OUR STUDENTS INTERN:

Bell Wealth Management  
Fortress  
Fresh Tracks Capital  
Merrill Lynch  
National Life Group  
Southwest Securities  
UBS

## WHERE OUR GRADS WORK:

Financial Specialist // State of Vermont // Montpelier, VT  
  
Associate Analyst // Champlain Investment Partners // Burlington, VT  
  
Jr. Case Manager // Policygenius Inc. // Durham, NC  
  
Team Financial Advisor // Merrill Lynch // Burlington, VT  
  
Audit Associate // Johnson Lambert LLP // Burlington, VT  
  
Rates Analyst I // Texas Gas Service // Austin, TX

Start learning how to manage portfolios, conduct financial analysis, and develop and build financial models using real funds from the College's endowment. You'll graduate with comprehensive experience in business, financial tools like Factset, and best practices of the profession.

Champlain's Finance major is the only undergraduate Chartered Financial Analyst® (CFA) University Affiliation Program in Vermont. The CFA designation is the most respected and recognized investment credential in the world and is often called the "gold standard" for the investment management industry.

Our hands-on approach to finance provides opportunities to work on actual cases with real clients, so you can bring your learning to life in a very tangible way. You'll gain additional practical experience through paid internships, peer-tutoring positions, and competitions that will further develop your financial skill set.

The cornerstone of your Finance degree will be your Capstone experience, during which you will manage a portion of the College's endowment in an investment fund.

---

 Our double major in Accounting and Finance provides the expertise—and the required 150 academic credits—you'll need to sit for the CPA licensure exam.

---

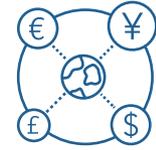

# International Business

It's not all globe-trotting glamour—but that's definitely part of it.

Conducting business in a global economy requires more than an affinity for travel; start exploring the cultural, political, and technological forces that shape an industry.

Our International Business curriculum gives you a comprehensive education in each aspect of business, all within the context of ethical business practices and the rapidly changing conditions defined by globalization. Through class projects and with real clients, you'll build practical experience and develop import/export strategies, help for-profit and nonprofit organizations identify international opportunities and challenges, and build business plans for international growth.

The program is designed so you can spend at least one semester abroad—many students choose to study abroad for an entire year. You'll even have opportunities for internships while you're in another country.

[champlain.edu/  
international-business](http://champlain.edu/international-business)

## 100%

of our 2021 International Business graduates were employed or continuing their education just six months after graduation.

### GO GLOBAL:

An exclusive grant from the Freeman Foundation offers an opportunity to travel to Asia to complete a summer internship at very little cost. The two primary destinations are Shanghai, China, and Kyoto, Japan.

[champlain.edu/  
marketing](https://champlain.edu/marketing)

#### **CERTIFICATIONS:**

Build your résumé and your skills while earning class credits. Select Marketing courses incorporate certification in industry-standard tools into their curriculum to give students an edge in their field well before they graduate.

# Marketing

Become an agile, data-driven marketing strategist for the post-pandemic economy.

Marketing is one of the most powerful forces in the world, and our Marketing program gives you the tools, techniques, and mindset you need to harness it. In the first semester of your Marketing major, you'll learn the importance of marketing for building success and influencing culture while you explore current marketing trends.

By your second semester, you will discover how to answer vital business questions using data. You will apply data cleaning and data analytic techniques using professional tools and software to produce the kind of visual, written, and verbal information that helps decision-makers evaluate and optimize business operations. By the end of your first year, you will be ready to take on a meaningful marketing internship.

Through collaborations with other students, internships, industry-expert guidance, and hands-on experience working with real clients, you'll immerse yourself in market research, design solutions, audio production, consumer behavior, analytics, public presentation, and more. From content creation to data analysis, our curriculum helps you figure out where you want to fit in the marketing landscape.

You'll emerge from Champlain's Marketing program as a confident strategist and savvy communicator who understands the legal and ethical implications of their work.

“Champlain’s marketing curriculum is not like any other marketing curriculum I’ve ever heard of. I have friends at other schools studying the same thing, and they don’t get nearly as much hands-on experience.”

# App Development

Launch a career in what CNN Money calls the number one job in America.

Connecting with friends, learning a language, navigating to a new location, saving money, telling time—there's no end to the things you can do with mobile applications. Start learning the foundations of app development in your very first semester by diving right into real projects. According to CNN, this career field is the best in the country for "big growth, great pay, and satisfying work."

Once you're comfortable with the languages and processes of programming an application, you'll be able to work with students in Champlain's business and design majors to create original apps.

Four years of hands-on practice and collaborative development will make you a top candidate for competitive app development positions. Your outstanding internships and career networking opportunities will put you above and beyond other candidates.

# Applied Mathematics

From pesky little problems to the world’s most pressing challenges, solutions are yours to discover.

In Applied Mathematics, you’ll learn how to use advanced math to tackle the problems that people and organizations face in the real world, such as environmental sustainability, result forecasting, and building and development.

Our Applied Mathematics program uniquely integrates math expertise with professional experience, preparing you for the industry and fields you’re interested in—like aerospace, engineering, or medicine. In addition to knowing the math, you’ll know how to use it on the job.

The Applied Mathematics curriculum combines Math Foundation courses in areas like calculus, statistics, discrete mathematics, and programming with Math Electives that let you focus on the areas of math you find most intriguing. Through Applied Mathematics Electives, you’ll put your math skills to use in projects like creating art, developing technology, or researching social wellness issues.

“We don’t play in theoretical fantasy land. It is exciting for me as a mathematician to really be able to focus with my students on how math is going to help them solve problems in the real world.”

**Melanie Brown** // Program Director & Associate Professor, Applied Mathematics

# Computer & Digital Forensics

Champlain College is the premier destination to study digital forensics.

[champlain.edu/digitalforensics](http://champlain.edu/digitalforensics)

As a Computer & Digital Forensics major, you'll learn about digital investigative processes and computer networking technology as well as law, and you'll be well qualified to work in digital investigations and cybersecurity.

According to the U.S. Bureau of Labor Statistics, the information security analysts profession is projected to grow 33% from 2020 to 2030, much faster than the average for all occupations, and has a median pay of \$103,590 per year. Champlain offers 16 industry-specific courses in digital forensics.

After thorough instruction and classroom projects, you'll gain outstanding experience participating in relevant internships with governmental agencies, tech businesses, and security firms.

You'll have the opportunity to take a paid position in our Senator Patrick Leahy Center for Digital Forensics & Cybersecurity—a fully equipped, state-of-the-art digital investigation lab—where you'll engage in leading-edge research and work with professional digital forensics investigators on real cases.

## 100%

of our 2021 Computer & Digital Forensics graduates were employed or continuing their education just six months after graduation.

### WHERE OUR GRADS WORK:

Senior Analyst // Dell  
Secureworks // Providence, RI

Associate Consultant // Mandiant  
(FireEye) // New York, NY

Security Analyst // NuHarbor  
Security // Colchester, VT

Security and Privacy Risk  
Associate // RSM // Boston, MA

Digital Forensics Consultant //  
Tracepoint // Chiba, Japan

Threat Analyst // VMware Carbon  
Black // San Antonio, TX

---

 Champlain College has been designated a National Center of Digital Forensics Academic Excellence by the U.S. Department of Defense Cyber Crime Center (DC3).

---

champlain.edu/  
cybersecurity

# Computer Networking & Cybersecurity

Learn cybersecurity from some of the best faculty in the world.

## 99%

Over the last six years, our Computer Networking & Cybersecurity graduates were employed or continuing their education just six months after graduation—and of those employed, 98% were in career-relevant positions.

---

 In the 2021 SC Awards, Champlain College was named the Best Higher Ed Cybersecurity program by industry professionals.

---

Champlain College has been designated a National Center of Academic Excellence in Information Assurance by the National Security Agency (NSA). The course content and curriculum meet the criteria established by the NSA and the Department of Homeland Security—rest assured, you're going to learn everything you need to know about cybersecurity.

From day one, you'll start to learn the full range of how to design, build, and secure enterprise network and computing environments. As you come to understand how cyberattacks are staged against network infrastructure, you'll learn how to handle and reduce their effects and how to use security measures to prevent and defend against future attacks.

You'll have numerous opportunities for relevant internships, including paid positions in the Senator Patrick Leahy Center for Digital Forensics & Cybersecurity. This work—involving real data and cases for various organizations and government agencies—offers unparalleled practical experience.

# Computer Science & Innovation

## Start practicing with the tools of technological creativity.

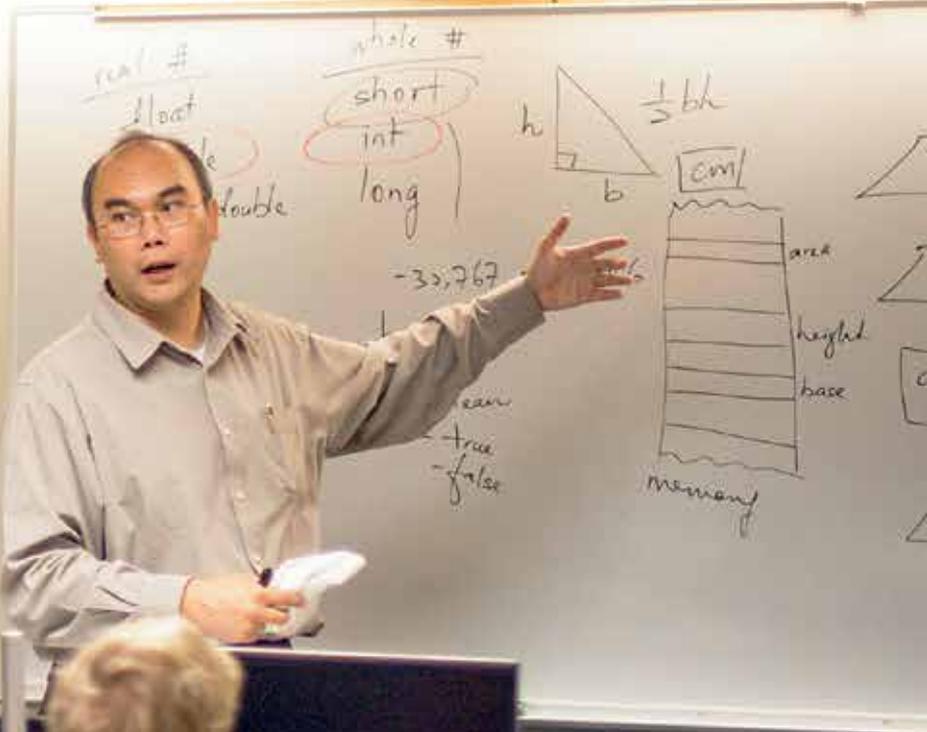

Learn important computer science theory and immediately put it to use on projects. In your first year, you'll start programming software and thinking about the future of our current technologies—this unique major covers the latest technological advances through a series of four Innovation courses that explore open-source development. You'll work with a variety of operating system environments and dive into advanced topics, such as emerging languages and artificial intelligence.

After four years of applied learning, your academic experience will culminate with a Capstone project that showcases the skills you've gained. Students' Capstone projects have recently included a black hole simulator, a digital motorcycle visor, and an app that uses machine learning to detect crowd approval.

With their innovative mindsets and deep experience in computer science and engineering, our students become sought-after professionals throughout the country and the world.

“I love how the school is career focused and how the computer science curriculum is hands-on. We work in a lot of programming languages from the start to gain exposure. I also love how accessible and personable the CSI faculty are.”

**Jessica Taylor** // Computer Science & Innovation

## FACULTY

# Narine Hall

**PRONOUNS:** She/her

**CLASSES:**

Advanced Data Analytics

Data Mining

Machine Learning

**FUN FACT:**

Narine Hall created InSpace, a groundbreaking virtual learning platform that transforms education and replaced Zoom during the pandemic for many educational institutions.

**“ As data scientists, some of our best outcomes occur when we make new technology and innovation accessible to different fields.”**

Narine Hall has devoted her career to making data science more accessible and diverse. She believes students do not have to be in math, science, or computer programming in order to understand the basic principles of machine learning. We already see examples of machine learning in daily life whenever Amazon, Google, or Netflix provide a personalized recommendation. She says students who understand even the basics of machine learning will have a career advantage since it has so many applications across industries and implications for society and our future.

# Data Science

When the big picture is difficult to see, fine details in data are there to help put it back into perspective.

Whether you'd like to work on algorithms for Netflix or contribute to world health projects, Champlain's Data Science program will prepare you to be a standout candidate for data positions across a variety of industries.

Through four years of hands-on projects and collaborative work, you'll graduate as an expert in data science, analysis, and visualization.

Along with your data analysis and statistics work, you'll gain programming, data visualization, and communication skills that are critical to success in most data science roles. Through our distinctive series of courses, you'll work on projects with industry partners and gain the real-world experience you need to participate in a data science internship after your first year.

[champlain.edu/  
data-science](http://champlain.edu/data-science)

## 92%

of our Data Science graduates over the last six years were employed or continuing their education just six months after graduation—and of those employed, 100% were in career-relevant positions.

### FEATURED COURSES:

#### Year 1

COMMUNICATION

INTERACTION DESIGN

MARKETING  
COMMUNICATION

PROFESSIONAL  
WRITING

# CREATIVE STUDIO MAJORS

**Turn creative passion into a profession.**

Our collaborative environment **reflects the way industries function**: We encourage writers, designers, video producers, and communicators to work together on interdisciplinary projects. Each major emphasizes artistic exploration, technical expertise, critical reflection, and career development you will gain firsthand experience by studying with **professionals in the field** and engaging with our **strong network of industry partners**. While you develop your creative expression, you'll learn to navigate the business aspects of your field.

[champlain.edu/animation](http://champlain.edu/animation)

# Animation

Be a part of the team that leaves us wondering, “How’d they do that?”

## CAREER OPTIONS INCLUDE:

3-D modeler

3-D or 2-D animator

Color correction and cleanup

Composer

Lighting artist

Marketing and advertising creative

Motion graphics animator

Stop-motion animator or claymator

Texture artist

Virtual environment designer

Virtual production artist

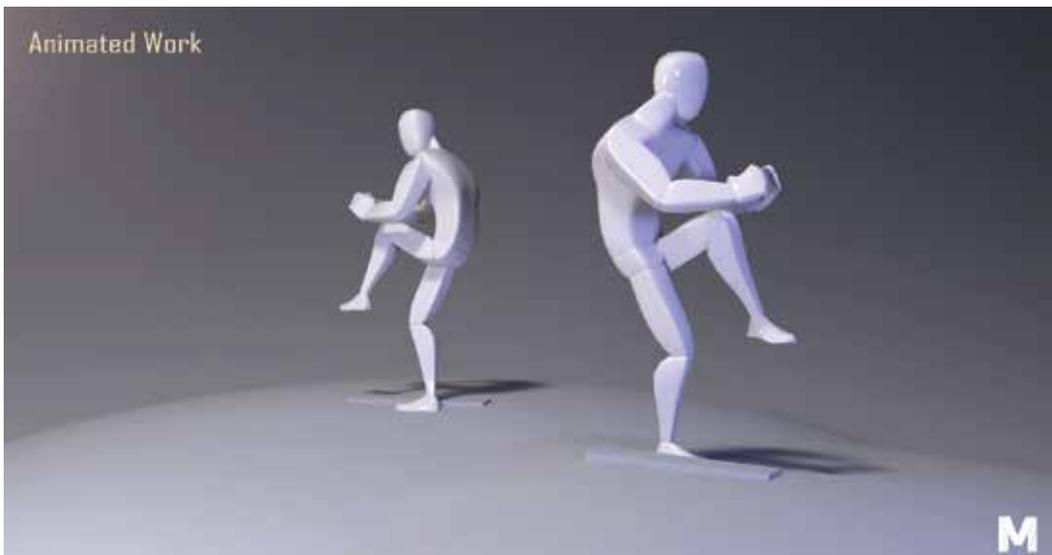

Visual effects (VFX) artist

Web and mobile designer

The capabilities of animation and visual storytelling may have advanced since the days of Disney’s *Steamboat Willie*, but the basic principles behind the art remain the same. The BFA in Animation at Champlain College is a bold exploration into the center of fine arts, media, and storytelling that challenges students to transform imagination into animation using applied theory, advanced tools and technology, and traditional artistic training.

In a collaborative, studio-like environment, students learn by doing as they produce projects together that expose them to concepts like 3-D and 2-D, green screen staging, post-production editing and compositing, character development and storyboarding, sound design, and more.

Plus, students have access to the same powerful game engines and technology that our Game Studio students use to create stunning work that’s earned them bragging rights for being among the Princeton Review’s top 10 programs for game design. There’s no limit to what animators will bring to life next with the emerging trends in virtual reality and hyperrealism.

# Broadcast Media Production

Everyone has a story to tell—we'll give you the who, what, where, when, why, and how to tell them your way.

Our Broadcast Media Production major prepares you to build a successful career in streaming media, television, radio, and independent production companies. You'll be exposed to all forms of broadcast content, from news and sports to entertainment and informational pieces.

Through internships and other collaborations with professionals in the field, you'll immerse yourself in broadcast media techniques, such as single-camera production, editing, writing, directing, and producing creative content. Using professional equipment and technology, both in the studio and out in the field, you'll build four years of experience crafting content that keeps an audience's attention.

Learn what it takes to produce documentaries, news, and live-action shows for today's most popular media platforms while you develop the adaptability to stay ahead of the curve as audiences trend toward new technologies.

**ON-CAMPUS OPPORTUNITY:**

Work with Maple Street Media, a student-run firm that helps local businesses with PR, social media, and digital presence strategies.

## Communication

Develop expertise in content creation, technology, interpersonal relationships, organizational leadership, and social media.

Highly skilled and well-rounded communication professionals are more sought after than ever, and Champlain's Communication major offers the depth and breadth of skills that will set you apart from other job candidates.

After developing a solid foundation of skills in writing, presenting, content creation, and relationship-building, you'll select a minor that will become an integral part of your studies. Your minor allows you to focus on the aspects of communication that interest you most, and you'll gain incredible hands-on experience through classroom projects and industry internships.

Champlain provides an unbeatable combination of worldwide opportunity and small-institution support—you'll be able to work with a wide variety of globally respected clients on fascinating projects, and your professors will go out of their way to provide valuable resources and help you network.

You'll graduate with a substantial résumé, an impressive portfolio, and the confidence to enter any industry as an experienced communication professional.

# Duncan Persons

**PRONOUNS:** He/him

**HOMETOWN:** Queensbury, NY

**MAJOR:** Communication

**NUMBER OF INTERNSHIPS:** 6

**BEST FACULTY ADVISOR EVER:**

Nancy Kerr

**What do you like most about your Communication major?** Communication has been great because you can explore so many different classes—from PR to Video Storytelling to Graphic Design. I have those skill sets, so if it's needed at my job, I can say, "I can totally help you with that."

**How have you changed at Champlain?** Champlain has done an amazing job at pushing me to go outside of my comfort zone, to go out and grab opportunities when they present themselves. This school has a really great hands-on approach to making students understand that it's OK to try and to fail, just make sure you learn.

[champlain.edu/  
creative-media](http://champlain.edu/creative-media)

**CONCENTRATIONS:**

Creative Writing  
Game Media  
Interaction Design  
Moving Image (Film & Video)  
Sonic Arts  
Visual Art & Design

# Creative Media

Fine arts for today's creator economy.

Experiment in a variety of media and develop your ideas about artistic expression. After exploring the kinds of art that intrigue you most, you'll choose a primary and secondary concentration to develop your unique style and skill sets.

While you're gaining skills in multiple media forms, you will also hone your creative process by evaluating, deconstructing, and revising your work in collaborative portfolio classes and seminars. You'll build a professional portfolio that can include performances, drawings, digital media, poetry, sculpture, film, and all kinds of art installations.

This distinctive major—with its cross-disciplinary focus, deliberate emphasis on the business aspect of artistic endeavors, and support of courageous innovation—will allow you to creatively explore emerging media and prepare yourself to viably apply your talents and skills to the marketplace.

“Champlain has really helped me build my portfolio and a greater understanding of my brand as an artist and creator. Especially as I move further into the freelance market, building a brand is so important to discoverability and what people reach out to you for.”

**Miranda Rodriguez** // Creative Media

# Filmmaking

Immerse yourself in the art and science of film.

With guidance from award-winning filmmakers, you'll gain hands-on experience in various roles, from director and cinematographer to sound designer and editor. Once you've explored the many opportunities in film production, you'll choose a concentration and focus on the aspects that interest you most.

You'll develop your personal voice in the production of narrative, experimental, and documentary films, as well as corporate marketing work. You'll also share your films through numerous contests, film festivals, regional television segments, and more.

While you build a thorough knowledge base in film history, aesthetics, criticism, and the newest technologies, you'll also learn the business of filmmaking to help you polish your signature style and prepare you for a variety of creative opportunities in the industry.

Our faculty know that it's one thing to make a great film, but it's another to get it seen by the public. That's why they guide students through the film festival submissions process, requiring all Capstone projects be rounded out in press kits, featuring compelling stills, trailers, synopses, and artist statements.

# Graphic Design & Visual Communication

Develop your design talents while you build a résumé tailored to a rewarding career.

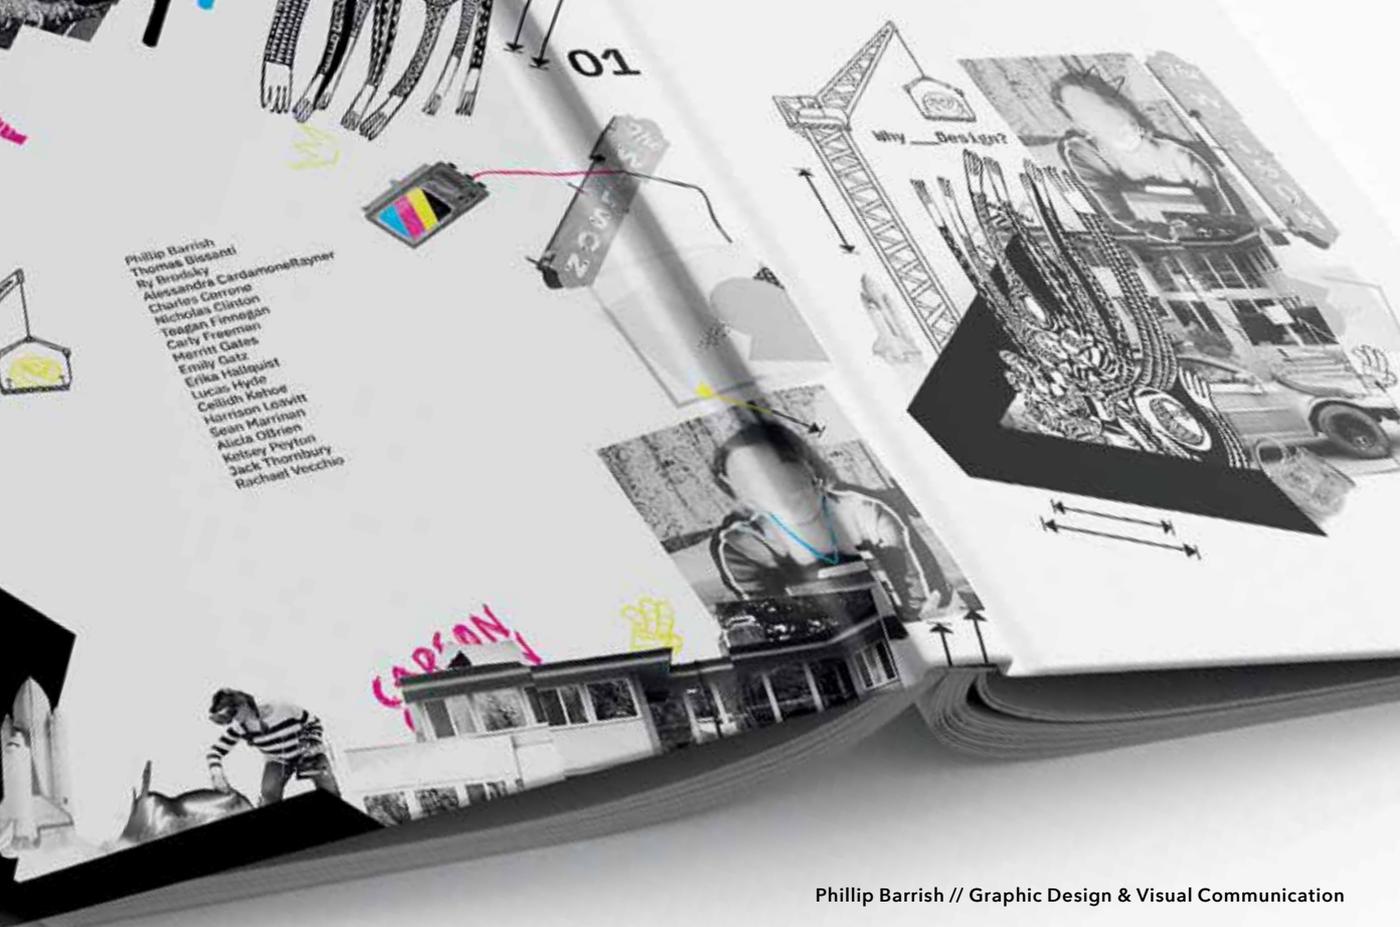

Bridging traditional art principles and innovative technologies, Champlain’s Graphic Design & Visual Communication major will have you exploring a wide spectrum of projects and design solutions. Fully accredited by the National Association of Schools of Art and Design (NASAD), the program will give you deep experience in the concepts and skills you need to become a creative problem solver and accomplished designer.

You’ll be well practiced in graphic design techniques as well as strategic planning for visual campaigns and messaging. Through internships with our local partners, you can experience the thrill of seeing your professional work in the community.

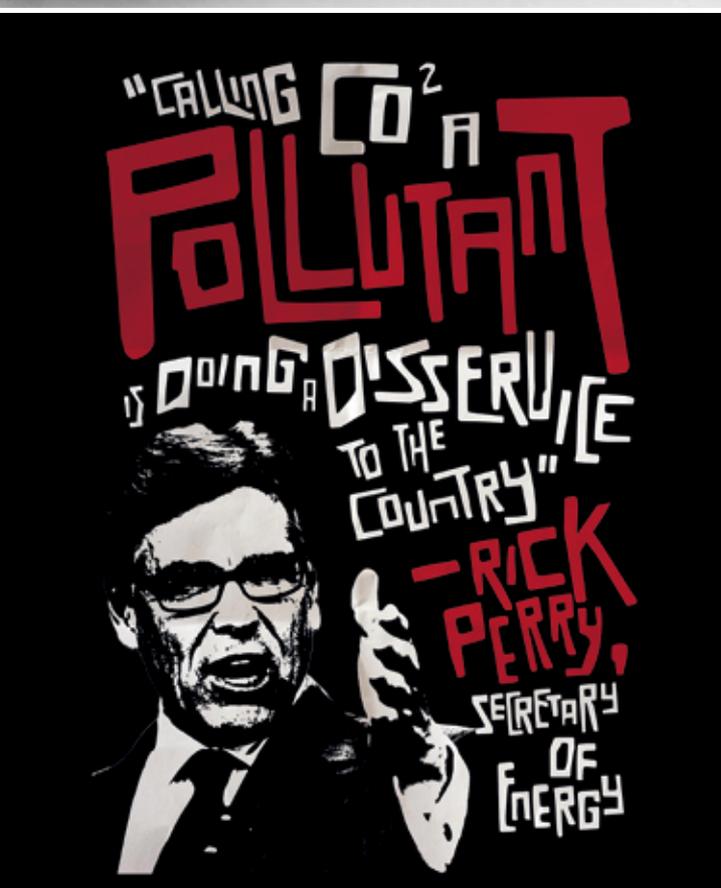

By the time you graduate, you’ll have a professional-level design portfolio that’s been rigorously critiqued by a panel of guest designers from top design firms.

“All the design professors I’ve had are amazing! They love talking after class, they’ll help you make connections, and they’ll give you valuable critique to make you better at what you do.”

Web Design I

### Year 3

Interaction Design Production  
User Research Methods &  
Analysis

### Year 4

Design for Social Innovation  
Interaction Design Capstone

Gain four years of rich experience in the growing field of interaction design. Encompassing areas such as user experience (UX) and user interface (UI) design, our Interaction Design major covers fascinating topics in visual design, programming, and psychology.

The popularity of an app, product, or device often comes down to users' experience with it: Is it easy—and appealing—to use? Learn what makes an interaction successful and how to create that experience for your audience.

You'll collaborate with students in other Champlain majors, such as App Development and Graphic Design & Visual Communication, to complete projects that put your skills to use. Through plentiful internship opportunities, you can dive into the detail and nuance of real interaction design work.

After exploring programming and visual design, you'll choose a concentration and focus your education on one or the other. Alternatively, you can work with your Faculty Advisor to choose program electives that support your goals.

# Marketing Communication

Graduate with an impressive variety of industry-standard certifications.

As lines between communication and marketing become increasingly blurred, employers are seeing a need for quick-thinking, versatile leaders with experience in both fields.

Our rigorous Marketing Communication curriculum immerses you in the practical work of your profession. You'll plan campaign strategies, create content, and engage audiences through a variety of communication channels. You'll choose a minor by the end of your second year, building additional expertise in an area that can help you define your career path.

By learning the foundations of communication and marketing in your first year and learning through hands-on practice, you'll get a head start on valuable internship work. Employers turn to Champlain for interns because our students are quick to make significant contributions to their marketing and public relations strategies.

**What do you like most about the Professional Writing major?** “The Professional Writing major expands your writing skills to a whole new level. Even when choosing a concentration, you still learn the foundational pieces of each type of writing, exposing you to new possibilities in your future career.”

**How have you changed at Champlain?** “I’ve always known what I want to do career-wise. At Champlain, I’ve learned how to make connections with my peers, faculty, and industry professionals who visit the College. Champlain prepares you to be skilled in your field, but perhaps more importantly, you also learn how to network and make new connections.”

**How is Champlain preparing you for the real world?** “As Editor-in-Chief of *The Crossover*, Champlain’s student-run news site, I am able to take what I learn in classes about editing, writing, and publishing and apply it to something real. I’m known on campus for getting the nitty-gritty information and using *The Crossover’s* platform to educate others on the world around us, as well as myself.”

# Professional Writing

Find your voice—and learn how to amplify it.

For writers today, rapid changes in digital communication, social media, and print require a solid foundation in the mechanics of good writing and editing, a storyteller's gift for narrative, a poet's eye for detail, and a desire to continue developing your talents in a dynamic industry.

Develop the adaptability to adjust your voice and techniques to suit the needs of your client or employer. Fine-tune your creative ideas and learn how to showcase your work. Practice marketing, public relations, graphic design, and content creation for emerging media.

Our Professional Writing program offers courses in creative writing, poetry, screenwriting, and technical writing, along with a wide range of electives that will enhance your writing abilities and expand your skill set.

At Champlain College, you learn the professional aspects of writing and how to get paid doing what you love. And while you'll certainly explore literature and learn to critique writing, you'll do so much more than this and explore beyond the boundaries of a traditional English program. You'll gain hands-on experience in various fields through project-based courses, internships, and the Champlain College Center for Publishing.

Students in this major will choose a concentration to hone their craft; you'll graduate with a portfolio of work you're proud to share.

“Learning and mastering the craft of writing is one important takeaway, but knowing what to do with it is another aspect that I feel is often overlooked by most institutions.”

# Game Art

See your art come to life.

Perfect for artists seeking a rewarding career, our rigorous Game Art curriculum builds digital and technical skills on a solid foundation of art principles.

Through the Game Studio at Champlain, you will be part of a creative team in an environment that replicates real studios in the game industry. In addition to developing extensive skills in creating 2-D and 3-D game environments, characters, and animation, you'll practice collaboration, communication, and all the power skills that come with working on a professional team.

By the time you graduate, you'll have an impressive portfolio of models, animations, sculptures, and concept art. You'll be able to proudly showcase your art to the game industry recruiters who attend our annual Game Studio Senior Show.

“Working with so many talented artists made me more of a collaborator. I also got to talk to a lot of people who have been in the game industry for decades, and I have gained very useful knowledge about it—and have more realistic expectations.”

**Olga Kachura** // Game Art

Jennifer Carlin // Game Art

Introduction to Game Business & Publishing

### Year 2

Business Law  
The Game Business Lifecycle

### Year 3

Managerial Economics  
The Global Game Industry

### Year 4

Game Development Capstone  
Game Studio

## CAREER OPTIONS INCLUDE:

Esports Brand Manager  
Digital Product Manager  
User Experience Analyst  
Esports Game Agent (fraud and cheating)  
Esports Broadcasting  
Influencer Partnership Manager  
Branded Content Coordinator  
Live/Streaming Event Manager

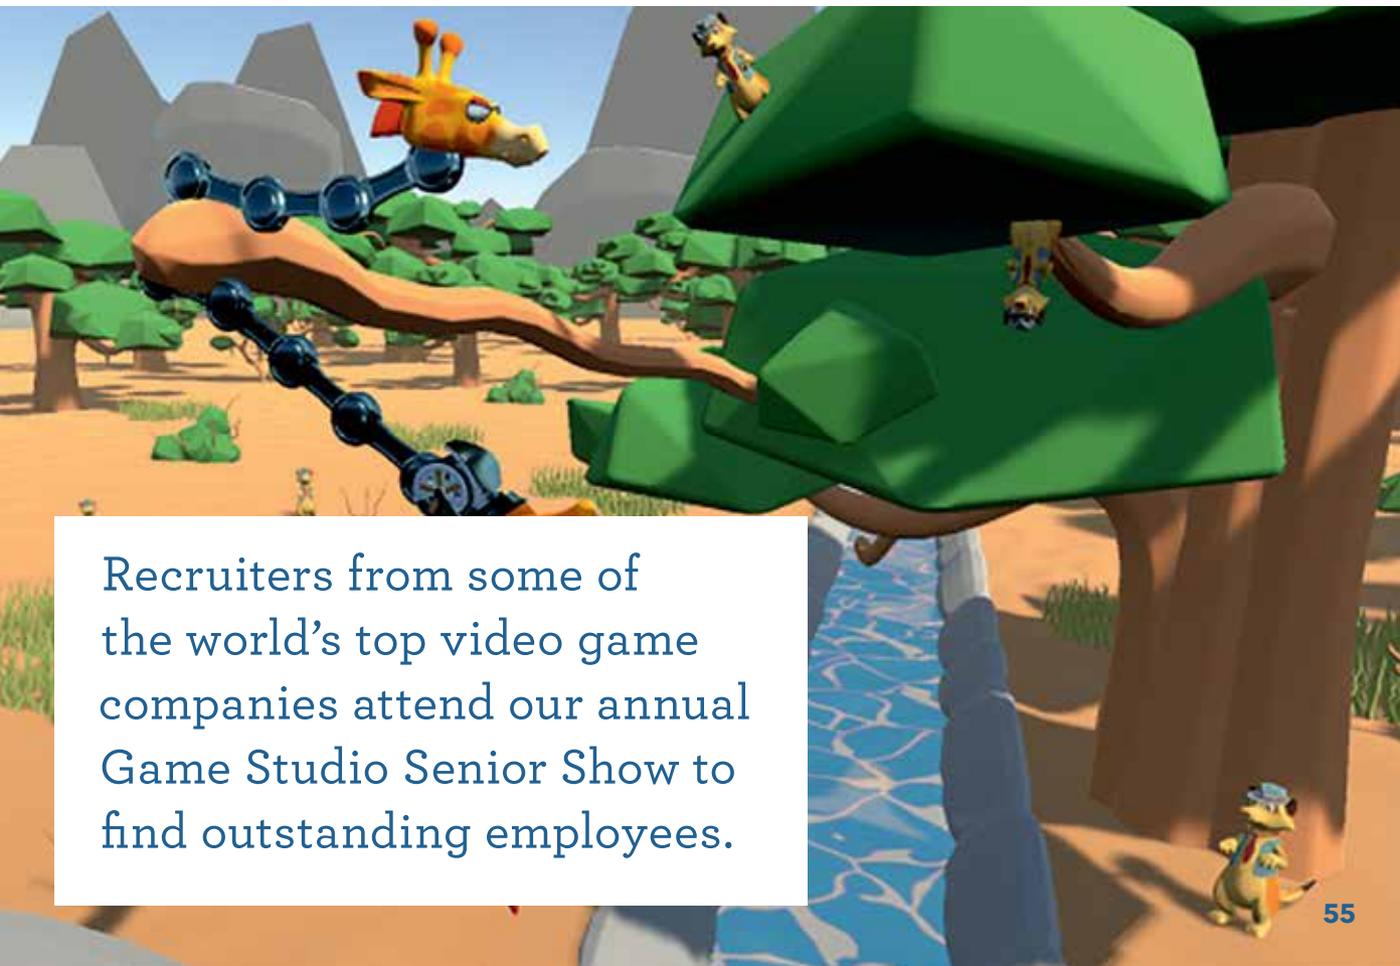

Instead of applying broad business experience to a specific industry after you graduate, this program allows you to develop your business acumen within the context of game markets and production cycles.

Business strategy, user engagement analysis, financial modeling, esports partnership management—the game industry relies on business-minded individuals in all manner of roles. Outside of game development, there’s a lot going on to promote games, gather research, and bring a game to the public.

After learning the foundations of business and the game industry in year one, you’ll be ready to dive into résumé-building internships. Our close ties to game businesses—from small studios to some of the biggest names in the world—ensure a wide variety of on-the-job learning opportunities.

In your second year, you’ll choose a concentration that allows you to focus on the aspects of game publishing that interest you most. Guided by experts in game, business, and career development, you’ll explore the innumerable career options and specialized fields within the game industry and start mapping your way into your dream job.

Rooster Teeth in Austin, TX

Double Stallion in Montreal, Canada

**BEST THING ABOUT CAMPUS LIFE:**

The connections you build with people in your dorm that first year.

**GAME THAT GOT YOU HOOKED:**

Skyrim

**What projects have you worked on in classes that you've found particularly rewarding?**

"There are too many to choose from! One game I worked on my junior year, a survival game called *Lymantria Dispar*, was a challenge to develop and implement a narrative that wasn't the focus of the gameplay, but that really added to the game and improved replayability."

**How has the Upside-Down Curriculum enhanced your experience?** "Being thrown into teams and development processes immediately at the start of my college career helped me confirm that game design was something I actually wanted to commit to. Without having hands-on experience, I feel like we wouldn't have the chance to understand our future careers nearly as well, not to mention we wouldn't be as prepared for professional lives after graduation."

# Game Design

Become the architect of your new favorite games.

From logic to levels to storylines, learn how to design engaging gameplay. You'll explore the different types of game design and build extensive skills in your areas of interest.

Practice building the foundational logic and mechanics of game operations. Determine the parameters of play on each level of the game world and design the step-by-step player experience. Map the overall story experience through traditional narrative, dialogue, characters, and environment. A Sonic Arts concentration is available for students interested in the auditory aspects of games.

On day one, you'll jump into a hands-on curriculum that allows you to build an impressive portfolio of collaborative work over four years. The immersive experience and environment of our Game Studio uniquely prepares you to enter the industry directly—first as a student intern, and again as a graduating professional.

# Game Production Management

Learn how to lead a development team to produce the next big video game.

Working in our Game Studio environment, you'll learn the whole development process by leading a team through it. You'll become a seasoned pro at team motivation, asset organization, and liaising between your department and company executives.

In addition to refining your leadership and project management skills, you'll gain firsthand experience in game-specific ways to support your team, from playtesting beta versions to interpreting player feedback. Through game industry internships, you'll become accustomed to the responsibility of your role and the ever-changing nature of its day-to-day work.

With four years of direct experience, you'll create an impressive portfolio of collaborative work and write a résumé that showcases your project management, game fluency, team leadership, and business skills.

# Game Programming

Create magic—bring video game concepts to life for players.

In our Game Programming major, you'll learn valuable and versatile programming skills in the context of game development.

Your instructors have extensive industry experience and contacts, and throughout the program, you'll have opportunities to meet guest speakers, recruiters, and Game Studio alumni. The internships available for our Game Programmers offer innovative, new ways to create programming solutions.

While you're immersed in computer science, programming languages, and game engines, you'll also practice communicating with colleagues in other game disciplines. Your work in the Game Studio will give you a significant advantage over the other job candidates once you get out into this competitive market: While many candidates will bring general programming knowledge to a game-specific position, you'll have four years of solid game programming experience and a portfolio that speaks for itself.

Portfolio for Game Sound  
Design

# Game Sound Design

Build tension, amplify action, and design the perfect atmosphere.

A good video game relies on a great soundtrack. Our Game Sound Design major is perfect for students who can't wait to design the audio elements of a game.

You'll learn music composition, scoring, voice-over recording, game engine scripting, and more—all while working directly with game engines on a game development team. Expert faculty will support you in developing your technical skills and refining your ear for acoustics. Your well-connected Career Coach will help you find internships that put your sound design skills to good use.

By diving into the hands-on design and production of game audio for four years, you'll bring an unmatched expertise—and portfolio of work—to future employers.

---

 The Champlain Sound Studio has been designed and built from the ground up as a music studio. It has complete sonic isolation, a wide variety of available instruments, and an SSL XL desk—a world-class mixing console.

# HUMAN STUDIES & EDUCATION MAJORS

## Build a career with a positive impact.

Through extensive opportunities in community organizations, schools, government agencies, and other real world settings, you'll gain invaluable experience. These classroom projects, internships, and field placements help you decide **where to focus your efforts** and who you want to **become as a professional**. Wherever your undergraduate work takes you from the Vermont State House to an elementary school in Ireland you'll be a strong role model in your community and in the world long before you graduate.

[champlain.edu/  
appliedsustainability](http://champlain.edu/appliedsustainability)

**CONCENTRATIONS:**

Data Science for Sustainability  
Dialogue & Consensus Building  
for Sustainable Solutions  
Education for Sustainability  
Environmental Communication  
Environmental Policy  
Environmental Studies  
Reinventing Business Through  
Sustainability

**FEATURED COURSES:**

**Year 1**

Environmental Earth Sciences  
Introduction to Sustainability  
Studies

**Year 2**

Food Systems & Policy  
Policy & Governance in  
Sustainable Systems

**Year 3**

Campus & Community as a  
Living Lab  
Equity, Justice & Sustainability

**Year 4**

Ecological Economics  
Sustainability Applications  
(Internship)

# Applied Sustainability

Saving the world is a full-time job.

Our natural environments, social systems, and governments are intricately linked with one another. Rather than study each area separately, explore the intersections to discover where you can make the most effective impact.

In Champlain's Applied Sustainability major, you'll start studying social justice, environmental health, and economic welfare on day one.

In your third year, you'll be encouraged to choose a concentration to hone your expertise and help narrow down the wide variety of career options to your main areas of interest.

After four years of experiential learning and expert guidance, you'll be ready to nurture a sustainable future for people, the planet, and profit.

# Criminal Justice

Become an effective and ethical community leader in justice.

The demand for reform-minded criminal justice professionals has exploded. Our program allows you to delve into the full spectrum of criminal justice topics, from lab-based forensics to restorative justice systems.

Your instructors are professionals with insider perspectives, including criminal trial judges, lawyers, and Vermont's Attorney General. Your coursework will include projects such as writing solutions to modern ethical dilemmas, participating in mock trials under the guidance of real trial judges, and designing a new criminal justice system over the course of a semester.

With remarkable experiential learning opportunities and an innovative, current curriculum, you will enter the workforce with the skills our communities need most.

[champlain.edu/  
criminal-justice](http://champlain.edu/criminal-justice)

#### **PASS IT ON:**

Students have the opportunity to participate in the Prison Law Initiative, a yearlong internship teaching the incarcerated how to conduct legal research and writing.

#### **EXPERIENCE THE SYSTEM AT WORK:**

As a senior, you will complete fieldwork in a local, state, or federal criminal justice agency to gain crucial hands-on experience and confidence in dealing with real-life situations.

**“ The small classes are extremely beneficial because we can go through real-world experiences and ask any questions we have. We are also encouraged to go into the field early and often. My third year, I took a job in the Emergency Department at the University of Vermont Medical Center doing crisis work, and I already felt prepared at that point.”**

**Liza Ryan** // Criminal Justice and Social Work

champlain.edu/  
education

**CONCENTRATIONS:**

**WHERE OUR GRADS WORK:**

- Homeroom Teacher // Nashville International Academy // Nashville, TN
- Lead Teacher // Wildwood Learning Center // Hopkinton, MA
- 6th Grade Social Studies Teacher // Burlington School District // Burlington, VT

# Education

Get into local classrooms every year of your undergraduate studies.

At Champlain, you'll work with students in local classrooms throughout all four years of college, doing fieldwork and observation that aligns with your coursework each semester. This level of classroom involvement and practical experience is uncommon for most education majors.

You'll dive deeply into curriculum design and develop an understanding of learner differences and culturally responsive instructional practices. You'll be able to take advantage of service learning opportunities both locally and internationally.

With support from expert faculty, you'll build confidence and experience by incrementally working up to your final senior semester of full-time classroom teaching.

Depending on your preferred grade levels and subject areas, you may be able to choose more than one concentration. You'll work closely with your Faculty Advisor to explore your interests, choose your concentration(s), and create the ideal pathway into the teaching career you envision.

---

 Upon graduation, you'll be eligible—and very well prepared—to apply for a teaching license in Vermont, and your Advisor can help you navigate licensure in another state.

---

“The fall semester of my first year, I got to help out in a classroom, which is rare for education majors at other schools.”

Andrew Connell // Education

# Law

You don't have to wait until graduate school.

Start studying law on day one. Champlain's Law major offers deep career preparation through courses not usually encountered in undergraduate pre-law or legal studies programs.

One of just a few undergraduate Law degrees in the country, this program offers an ideal blend of firsthand legal experience and humanities-based liberal arts. All of your Law courses will be taught by legal experts—judges, lawyers, and elected or appointed officials—who will give you a true insider understanding of law and its procedures.

You'll gain analytical and practical skills in subjects such as criminal law, contract law, torts, civil procedure, and family law—and that's just in your first two years. A field placement with a law office, governmental agency, or corporate legal department during your senior year will give you the experience that high-quality graduate programs and employers seek.

[champlain.edu/  
law](http://champlain.edu/law)

## WHERE OUR GRADS GO TO LAW SCHOOL:

Duke University School of Law  
New York Law School  
Northeastern University School  
of Law  
University of Michigan Law  
School  
University of North Carolina  
School of Law  
University of Pittsburgh School  
of Law  
University of Texas School of  
Law: Austin  
Vermont Law School

---

 Champlain Law graduates who meet certain eligibility criteria  
may be admitted to New York Law School with a merit scholarship.

---

“After the courses at Champlain, law school becomes sort of ‘Law School 2.0’ by the time you get there.”

**Kathryn Young** // Law

### CONCENTRATIONS:

Flex Path (create your own)

Health & Wellbeing

Social Change / Social Impact

### WHERE OUR GRADS WORK:

Kid Logic Learning // South Burlington, VT

Behavioral Interventionist // Howard Center // Rutland, VT

Hiring HR Assistant // U.S. Citizenship & Immigration Services // Arlington, VA

Research Assistant // University of Maine Center on Aging // Bangor, ME

Special Education Support Staff // Bellcate School // Essex Junction, VT

# Psychology

Personalized attention to research in a world-class behavioral neuroscience lab.

You can learn psychology almost anywhere. At Champlain, you also learn how to turn it into a career. In the Champlain College Behavioral Neuroscience Lab, you'll be able to conduct research with the guidance of the experienced doctors who teach in the program. You'll have access to state-of-the-art tools, such as EEG testing, physiology recording equipment, and a tDCS machine (to stimulate specific areas of the brain).

While you're taking psychology courses in your first year, you'll begin to think about how you'd like to use your degree after graduation—you'll become familiar with the career options available and can start narrowing them down. In your third and fourth years at Champlain, you'll choose a concentration to focus on the aspects of psychology that interest you most. These courses are hands-on and practical, and will include professional and/or research internships.

## FACULTY

# Dr. Kimberly Quinn

**PRONOUNS:** She/her

**CLASSES:**  
Mindcraft

Cognitive Psychology

**FUN FACT:**

Enjoys downhill skiing,  
parasailing, and  
white-water rafting.

A portrait of Dr. Kimberly Quinn, a woman with short, wavy, light brown hair, wearing red-rimmed glasses and a rust-colored sweater. She is smiling and looking towards the camera. The background is plain white.

**“ Champlain is a ‘think outside the box’ kind of campus, which encourages the freedom of creative expression for students and professors.”**

Along with her role as a professor, Dr. Quinn serves as Champlain College’s Wellbeing and Success Coach. She hosts webinars on Trauma & Resilience and a weekly Mindcraft podcast series aimed at striving for optimal wellbeing and life satisfaction. Dr. Quinn has been a featured speaker for TEDx and other events on topics such as social media and wellbeing, and embracing neurodiversity.

## STUDENT

---

# Riaz Clark

**PRONOUNS:** They/them  
**HOMETOWN:** Ann Arbor, MI  
**MAJOR:** Social Work

**CURRENT JOB:**  
Family Programming Assistant  
at the YMCA in Burlington, VT

**LEADERSHIP ROLE:**  
Co-leader of Phi Alpha Social  
Work Honor Society

**OTHER CLUBS, JOBS,  
AND ACTIVITIES:**  
Diversity Ambassador

Resident Assistant

Director of Operations,  
Student Government  
Association

### **How has Champlain started to prepare you for your future?**

"It's really the Upside-Down Curriculum. Champlain got me into my major and my profession on that first day. I was working with kids and the people I want to be working with from the start.

"Champlain literally puts you in the real world on your first day. You're coding for projects that people on Church Street need to get done. You're doing photography for local businesses. You're actively becoming a member of this society, rather than learning what it looks like to become a member of this society."

# Social Work

Make a career of empowering people.

If you are driven to bring significant change to the world, you will find no better place to start than Champlain's Bachelor of Social Work (BSW) program.

Through a combination of broad-based social work instruction and extensive field experiences, you'll be prepared for a career rich in the satisfaction that comes from providing resources, help, and hope to those who need it most. Beginning in your first year, you'll be ready for internship opportunities that allow you to connect with the community in meaningful ways.

In your senior year, you will participate in a yearlong internship that provides you with more than 400 hours of direct experience. You'll work under the supervision and mentorship of highly trained field instructors in community settings. This intense immersion helps you develop your professional identity and hone your social work skills.

---

 Our Social Work program is accredited by the Council on Social Work Education (CSWE). Through this CSWE accreditation, Champlain graduates may apply to be considered for admission to a Master of Social Work program and earn a master's degree in one year instead of two.

---

[champlain.edu/  
social-work](https://champlain.edu/social-work)

## 100%

of our 2021 Social Work graduates were employed in career-relevant positions just six months after graduating.

### WHERE OUR GRADS WORK:

Residential Rehab Specialist //  
Riverbend CMHC // Concord, NH

Post-Adoption Case Worker //  
Adoption Journeys // Waltham, MA

Wraparound Facilitator // Center for  
Human Services // Shoreline, WA

Residential Counselor //  
Northeastern Family Institute VT //  
Burlington, VT

“During the second semester of my first year, I was able to start volunteering at the YMCA, and now I have a job there. At a traditional school, with a traditional curriculum, I wouldn't be doing that until my junior year.”

**Riaz Clark** // Social Work

Environmental Studies &  
Conflict Management  
Global Diversity  
Government Studies  
Innovation & Entrepreneurship  
Media Production  
Mobile Application  
Development  
Professional Writing  
Psychology  
Psychology, Conflict &  
Mediation  
Software Engineering  
Sonic Arts  
Strategic Communication  
Sustainability Studies

# Degree Design Lab: Integrative Professional Studies

If you can imagine a career in it, Degree Design Lab can help you build the most direct, tailored path to studying it.

With this many subject areas to choose from, we know how challenging it can be to pick just one or maybe even two majors. That's why we've made it easier for you to study what you love. In addition to the Upside-Down Curriculum that engages students in their majors from day one, the Degree Design Lab (DDL) is a tool to help students test-drive majors they're interested in and ultimately map out a completely customized Champlain College degree: the BS in Integrative Professional Studies.

Students can select up to three topics from roughly 50 options, known as "threads," that correspond to sequences of courses in that subject area. DDL students have woven threads together such as law and broadcast media, cybersecurity and social justice, and sonic arts and cybersecurity, to name a few.

Every student is supported by a team of Faculty Advisors to focus on both the subject areas and the gray areas in between them, to build integrated thinking, learning, and working skills employers today demand. You'll bridge your chosen research areas in the Lab and challenge your knowledge base, as well as make connections to big-picture themes and strategies for team success.

# Undeclared

At Champlain College, you don't need to know exactly where you're going to get a head start getting there.

It doesn't matter if you start college knowing which field you wish to pursue when you graduate—you just need to know you want to graduate prepared to do something you love and to live a life that's satisfying and meaningful.

Champlain is uniquely positioned to help you if you are still weighing your options about which major to take. The Upside-Down Curriculum is perfect for you—it will allow you to test-drive various career paths to see which aligns with your interests, abilities, and goals.

In fact, the Upside-Down Curriculum helped many students who entered Champlain without declaring a major quickly identify which fields they don't want to be in. It enables them to identify another major, switch directions quickly during their first year, and keep going without missing a beat.

The other important factors that help Champlain students identify the right major and thrive in it are our student-to-faculty ratio of 12:1 and average class size of 14. In this attentive environment, our faculty members will be able to get to know you on a personal level, so they can give you guidance that ensures you end up in a major (and a profession!) that aligns with your passions and strengths.

[champlain.edu/undeclared](https://champlain.edu/undeclared)

“Before you arrive at Champlain, you'll hear from your dedicated Professional Advisor, who will work with you to gauge your interests and help you select your first-semester classes.”

**Cynthia Brandenburg** // Special Assistant, Academic Affairs; Lead Faculty, Degree Design Lab; Professor, Core Division

# Learn by doing.

There's no substitute for real experience—that's why it's the heart of your Champlain education. From classroom projects to internships with big-name companies, you'll practice everything you learn.

## **INTERN EARLY. INTERN OFTEN.**

Because your classroom education is hands-on and skills-specific from the beginning, you bring professional know-how to your internships, even as early as your second semester. This is why employers—like Burton Snowboards, the U.S. Department of Homeland Security, the Office of U.S. Senator Patrick Leahy, NASA, and Ubisoft—come looking for Champlain students specifically, and often turn to our graduates to fill full-time positions.

## **CENTERS OF EXPERIENCE**

Right here on campus, our Centers of Experience offer credit-bearing and paid internships in which students apply their classroom learning and bring entrepreneurial visions to life.

## **SEE THE WORLD. CHANGE THE WORLD.**

To nurture global citizenship and expand perspectives, every major at Champlain is designed to accommodate at least one semester of study abroad. Among a variety of travel options, our two international campuses—in Dublin, Ireland, and Montreal, Canada—provide seamless opportunities to explore the world without leaving the Champlain community.

[champlain.edu/study-abroad](http://champlain.edu/study-abroad)

The Center for Innovation & Entrepreneurship offers students and faculty opportunities to help one another evolve their business ideas and passion projects.

## CHAMPLAIN'S CENTERS OF EXPERIENCE

**Center for Community & Social Justice** The mission of the Center is to promote whole community health and safety through new models of community engagement, social safety networks, and policing. The Center serves as a think tank and incubator for longer-term societal solutions that promote equal justice for all.  
[champlain.edu/ccsj](http://champlain.edu/ccsj)

**Center for Financial Literacy (CFL)** The CFL promotes financial literacy skills, allowing people to make more sound decisions about spending, credit, debt, investments, and complex financial situations, such as buying a home and saving for retirement. The CFL is nationally acclaimed and has become a go-to source for national media coverage of financial literacy. [champlain.edu/cfl](http://champlain.edu/cfl)

**Center for Innovation & Entrepreneurship (CIE)** A leader in entrepreneurship research, the CIE promotes entrepreneurial and innovator mindsets. This Center offers a unique opportunity for student entrepreneurs to get help launching a new business or developing their existing enterprise.  
[champlain.edu/cie](http://champlain.edu/cie)

Students from all majors have access to classes and events held at Generator, a makerspace and incubator for product and business development.

## CHAMPLAIN'S CENTERS OF EXPERIENCE

**Center for Publishing (CFP)** A hub for student-led publications, the CFP is a valuable outlet for creative students. It enables students to dig into print and digital publishing by trying on a wide variety of roles, such as writer, editor, designer, content contributor, coordinator, or marketer.

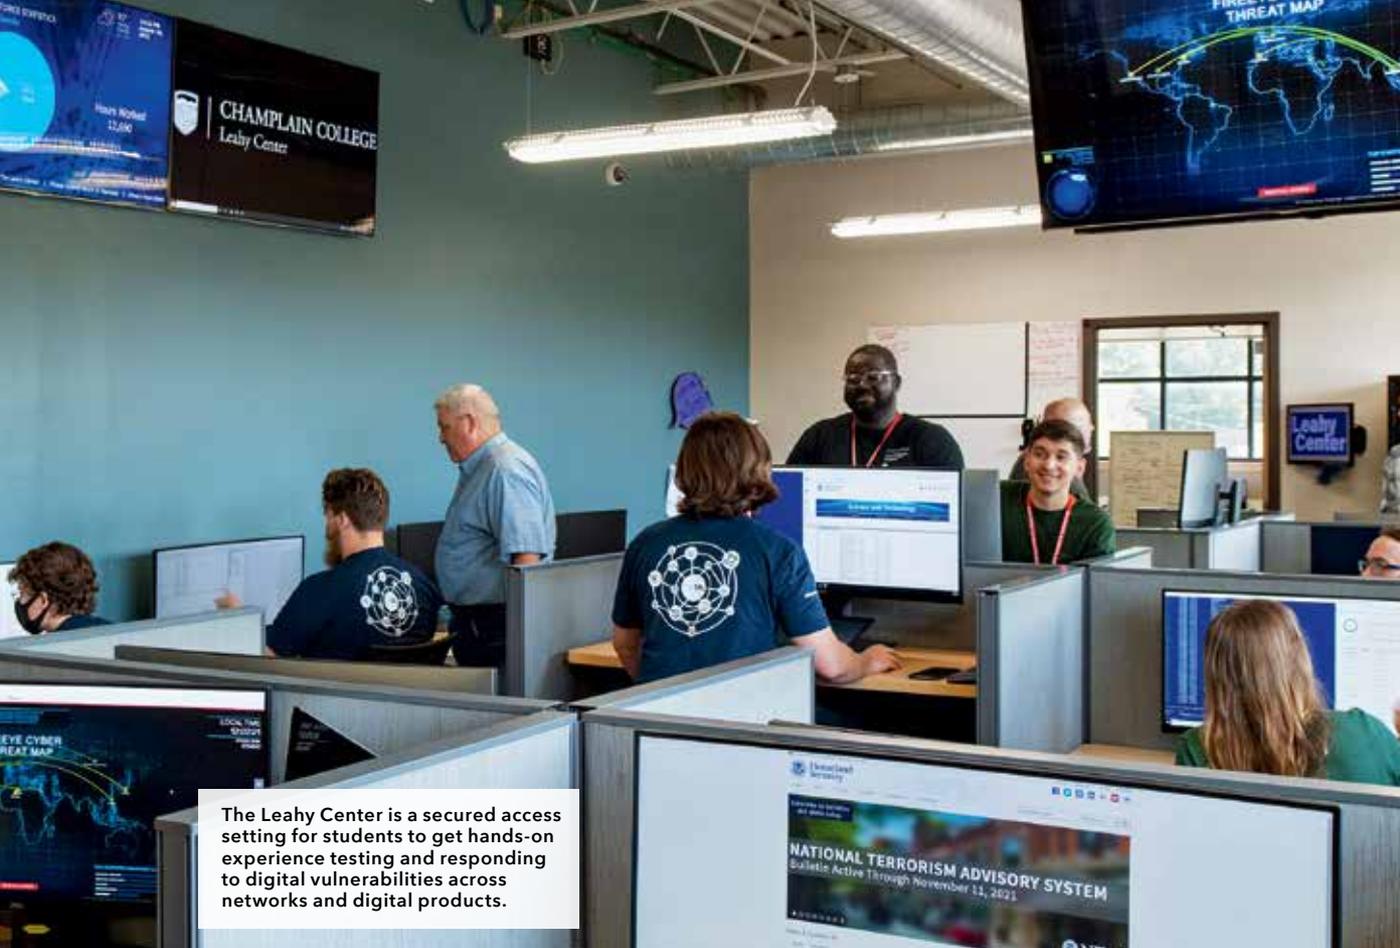

[champlain.edu/publishing](http://champlain.edu/publishing)

**Center for Service & Sustainability** The Center for Service & Sustainability provides students with leadership opportunities, international service trips, and resources for sustainable living practices. This Center also guides faculty through professional development workshops, coaching, and resources, so they can include service learning in their courses.

[champlain.edu/service](http://champlain.edu/service)

**David L. Cooperrider Center for Appreciative Inquiry** The Cooperrider Center is the only academic-based center in the world that focuses directly on Appreciative Inquiry (AI) and its implications for Positive Organizational Development and management. These methods, steeped in positive psychology, are used by organizations like Keurig Dr Pepper, the United Nations, and the Red Cross. The Center offers a full range of educational programs, research, AI certification, and consulting services.

[champlain.edu/appreciativeinquiry](http://champlain.edu/appreciativeinquiry)

The Leahy Center is a secured access setting for students to get hands-on experience testing and responding to digital vulnerabilities across networks and digital products.

**Emergent Media Center® (EMC)** The EMC is a creative studio that specializes in experiential education, design thinking, and interactive media. It delivers innovative solutions for partner organizations like IBM, Ubisoft, Google Earth, and the UVM Medical Center. [champlain.edu/emc](http://champlain.edu/emc)

**Generator** A makerspace is a creative environment where people share tools and knowledge to make almost anything. Through a partnership with Generator, a local makerspace that includes a dedicated area just for Champlain, students have access to 3-D printers, an electronics lab, a metalwork studio, woodshop space, and so much more. [champlain.edu/makerlab](http://champlain.edu/makerlab)

**Senator Patrick Leahy Center for Digital Forensics & Cybersecurity** The Leahy Center is a local, state, and national resource for digital investigation. Students work with faculty to provide digital forensics and cybersecurity services to a wide variety of organizations, from the Department of Defense to local nonprofits. [champlain.edu/leahycenter](http://champlain.edu/leahycenter)

# Champlain

## (at a glance)

---

**Champlain College is a small, not-for-profit, private residential college overlooking Lake Champlain in Burlington, Vermont, with additional campuses in Montreal, Canada, and Dublin, Ireland.**

**ACTIVITIES & CLUBS:** From Esports to Equestrian Club, Champlain has over 60 clubs, organizations, and leadership opportunities. And if we don't have a club you're interested in, you can easily start your own! There's something exciting happening every weekend; activities include bowling outings, trivia contests, movie nights, and more.

**ESTABLISHED:**

1878

**AVERAGE CLASS SIZE:**

“Visit the campus. Maybe within the first 10 minutes of being here, I looked at my mom and my dad and they kinda knew that this was the place for me.”

**Anthony Mahon** // Creative Media

# Apply

## COUNT-ON-IT FINANCIAL AID GUARANTEE

We believe when families are evaluating the financial implications of their student's college choice, they should know exactly what they can count on receiving from the school—not just for that important decision-making process in the first year, but for the entire length of a student's full-time enrollment.

When you receive your Financial Aid Offer letter as an admitted student, you can count on your scholarships from Champlain being consistent from year to year as long as you are enrolled full time—guaranteed.

## HOW TO APPLY

You may apply for admission as a first-year or transfer applicant by completing either the Common Application or Champlain's Application. There is no cost to apply to Champlain, and submitting standardized test scores is optional.

## DEADLINES

Early Decision I: November 15

Early Decision II: December 15

Regular Decision: January 15

Transfer Students: Priority Deadline June 15

Spring Enrollment: Priority Deadline October 1

## THESE MAJORS REQUIRE A PORTFOLIO:

Animation

Creative Media
