Check your medication coverage anytime.

This document was last updated on 09/01/2026.* Go online to see the most up-to-date list of covered medications.

- **Before your plan starts:** Go to **Cigna.com/druglist**. Select **Value** from the dropdown menu, then search for a medication or view the full list.
- **After your plan starts:** Log in to myCigna® app[1] or **myCigna.com**® and use the Price a Medication tool to check your coverage and costs.

Questions?

- **By phone:** Call the toll-free number on your Cigna Healthcare® ID card. We're here 24/7/365.
- **Online:** Log in to **myCigna.com** and use Click to Chat, Monday-Friday, 9:00 am-8:00 pm EST.

About this drug list.

This document shows which generic and brand-name medications are covered on the Cigna Healthcare Value 3-Tier Prescription Drug List starting **January 1, 2027**. Medications are grouped by the condition they treat or by medication type and listed in alphabetical (A–Z) order.

This drug list is regularly updated, so this document may not include all of the medications your plan covers. Your plan may not cover all of the medications listed here. Log in to the myCigna app or **myCigna.com**, or check your plan details, to see what's covered.

Note: Your plan doesn't cover prescription medications that treat allergies (like Allegra®, Clarinex®, Xyzal®, and generics) or heartburn and stomach acid problems (like Nexium®, Prilosec OTC®, and generics). These are available over-the-counter (OTC) without a prescription.

How to read this drug list.

Use the table below to understand how medications are covered.*

BLOOD PRESSURE/HEART MEDICATIONS

Medication	Tier	Notes
amlodipine	1	
amlodipine-benazepril	1	
amlodipine-olmesartan	1	QL
amlodipine-valsartan	1	
atenolol	1	
bisoprolol-hctz	1	
CALAN SR	3	
CAMZYOS	3	SP, PA, QL
candesartan	1	
cartia xt	1	
carvedilol	1	
carvedilol er	1	QL
CATAPRES-TTS 1	3	
CATAPRES-TTS 2	3	
CATAPRES-TTS 3	3	
clonidine patch, tablet	1	
CORLANOR ORAL SOLUTION	2	SP, PA
CORLANOR TABLET	2	PA
dilt xr	1	
diltiazem tablet	1	
diltiazem 12hr er	1	
diltiazem 24hr er	1	
diltiazem 24hr er (cd)	1	
diltiazem 24hr er (la)	1	QL
diltiazem 24hr er (xr)	1	
DIOVAN	3	ST

Medications are grouped by the **condition** they treat or by **medication type**

Tier (cost-share level) shows how much you may pay for a medication

Medications are listed in **alphabetical (A-Z) order**

Brand-name medications are shown in **ALL CAPITAL** letters

Specialty medications are marked with "**SP**"

Generic medications are shown in **lowercase** letters

Medications with **letters** in this column have extra coverage requirements

* This is just an example and may not show current coverage for these medications.

Tiers

We group covered medications into levels called tiers. The higher the tier, the more the medication may cost you to fill.

Tier 1	**Generics.** ***These medications are covered at your plan's lowest cost-share.*** They work the same as brand-name medications and provide the same health benefits – often at a lower cost.[3]	**$**
Tier 2	**Preferred brands.** These medications usually have a lower-cost generic option that treats the same condition.	**$$**
Tier 3	**Non-preferred brands.** ***These medications are covered at your plan's highest cost-share.*** They usually have lower-cost options that treat the same condition.	**$$$**

Letters in the Notes column

Medications with extra coverage requirements have letters next to their names. Here's what they mean:

PA	**Prior Authorization*** – This medication needs approval from Cigna Healthcare before it can be covered. Your doctor's office will need to send us information showing you meet the coverage requirements.
QL	**Quantity Limit*** – Your plan will only cover a certain amount each time you fill your prescription. If you need more than what's covered, your doctor's office can ask us to review whether more can be approved.
ST	**Step Therapy*** – Your plan doesn't cover this medication until you try one or more lower-cost preferred options first. If you've already tried a preferred option, or your doctor wants you to keep using this medication, your doctor's office can ask us to review whether it can be covered.
AGE	**Age Requirement*** – Your plan will only cover this medication if you're within a certain age range. If you're not and your doctor still wants you to take it, your doctor's office can ask us to review whether it can be covered.
SP	This is a **specialty medication** used to treat rare or complex medical conditions.** Some plans have extra coverage requirements – like limits on how much you can fill at one time or needing to use a certain pharmacy.
PPACA	Under the **Patient Protection and Affordable Care Act (PPACA)**, known as "health care reform," your plan covers this medication at no cost to you – no copay, coinsurance, or deductible.
OC	**Optional Coverage** – Most plans don't cover this medication, but some do. To see if your plan covers it, log in to the myCigna app or **myCigna.com**.

* **Not all plans include prior authorization, quantity limits, Step Therapy, or age limits for certain medications.** Log in to the myCigna app or myCigna.com to see if your plan includes these.

** What's considered a specialty medication can vary by state. For example, **Delaware and Illinois** may not consider every medication marked "SP" to be a specialty medication.

How to find your medication.

Find the condition your medication is used to treat – or the type of medication – in the table below. They're listed in alphabetical (A–Z) order. Then go to the page listed next to it to see how your medication is covered.

OC – Optional Coverage

Your questions, answered.

Find answers to common questions about your drug list and prescription coverage.

Q. Why do you make changes to the drug list?
A. We regularly review and update your plan's drug list so it includes safe, effective, and lower-cost options. Changes can happen for many reasons – for example, when new medications become available, others are no longer available, or costs change. These changes may include:

- **Moving a medication to a lower cost tier.** This can happen any time during the year.
- **Moving a brand-name medication to a higher cost tier when a generic becomes available.** This can happen any time during the year.
- **Moving a medication to a higher cost tier or no longer covering it.** This usually happens twice a year – on January 1 and July 1.
- **Adding extra coverage requirements to a medication.** This usually happens twice a year – on January 1 and July 1.

If a change affects your medication – like if it will cost more, won't be covered, or will have a coverage requirement added – we'll let you know before it happens. This gives you time to talk with your doctor about your options and decide what's best for your care.

Q. Why doesn't my plan cover certain medications?
A. To help keep your costs down, your plan doesn't cover certain high-cost brand-name medications if there's a lower-cost option that treats the same condition. If your doctor doesn't think a different option is right for you, they can ask us to review whether the medication can be covered.

Some medications and products aren't covered for any reason because they're a benefit exclusion. This means they aren't on your drug list and can't be approved through the review process. For example, your plan doesn't cover:

- Prescription medications that treat allergies (like Allegra, Clarinex, Xyzal, and generics) or heartburn and stomach acid problems (like Nexium, Prilosec OTC, and generics)
- Medications used for certain lifestyle conditions, like infertility, erectile dysfunction, or to help you quit smoking[4]
- Medications that the U.S. Food and Drug Administration (FDA) hasn't approved

Q. How do you decide which medications to cover?
A. The Cigna Healthcare Prescription Drug List is developed with the help of the Cigna Healthcare Pharmacy and Therapeutics (P&T) Committee, which is a group of practicing doctors and pharmacists, most of whom work outside of Cigna Healthcare. The group meets regularly to review medical evidence and information provided by federal agencies, drug manufacturers, medical professional associations, national organizations and peer-reviewed journals about the safety and effectiveness of medications that are newly approved by the FDA and medications already on the market.

The Cigna Healthcare Health Plan Commercial Value Assessment Committee (HVAC) then looks at the results of the P&T Committee's clinical review, as well as the medication's overall value and other factors before adding it to, or removing it from, the drug list.

Q. Why do certain medications need approval before my plan will cover them?
A. The review process helps make sure you're getting the right medication at the right cost and in the right amount.

Q. How do I know if a medication needs approval?
A. Check your drug list or log in to the myCigna app or **myCigna.com** and use the Price a Medication tool. If the medication has:

- **PA** (Prior Authorization) or **ST** (Step Therapy) next to it, it needs approval before it can be covered
- **QL** (Quantity Limit) next to it, you may need approval depending on how much you're filling at one time
- **AGE** (Age Requirement) next to it, you may need approval depending on your age

If your medication needs approval, ask your doctor's office to contact us to start a coverage review.

Your questions, answered. *(cont.)*

Q. What types of medications usually need approval?
A. Medications that:

- May not be safe to take with certain other medications
- Have lower-cost options that work just as well
- Should only be used for certain health conditions
- Are sometimes taken in the wrong way or more often than they should be

Q. What types of medications usually have quantity limits?
A. Medications that are often:

- Taken in larger amounts or for longer than they should be
- Used more often than recommended or in ways they shouldn't be

Q. What types of medications are part of Step Therapy?
A. They're usually high-cost medications that treat conditions like:

- ADD/ADHD
- Allergies
- Bladder problems
- Breathing problems
- Depression
- High blood pressure
- High cholesterol
- Osteoporosis
- Pain
- Skin conditions
- Sleep disorders

Q. Why does my medication have an age requirement?
A. It's to help keep you safe. Some medications are only tested and proven safe and effective for certain age groups. Medications don't work the same for everyone – for example, what works for adults may be too strong for kids, and what works for younger adults may not work as well for older adults.

Q. How do I get approval (prior authorization) for my medication?
A. Ask your doctor's office to contact us to start a coverage review – they'll take care of this for you. If they need a request form, they can get it from our provider portal at **cignaforhcp.com**.

We'll review the information your doctor sends and let you and your doctor know our decision and next steps. This can take up to five business days. You can check with your doctor's office for updates. If it's easier, log in to the myCigna app or **myCigna.com** to see where your medication is in the review process.

If it isn't approved, your plan won't cover it. You can still fill it without using your plan, but you'll pay the full price at the pharmacy. These costs won't count toward your deductible or out-of-pocket maximum.

If we don't get all the information we need, your doctor can send more and ask us to review it again. We're happy to take another look.

Q. What happens if I try to fill a prescription that needs approval, but I don't get it ahead of time?
A. When your pharmacist processes your prescription, they'll see that it needs approval before it can be covered. You can still fill it without using your plan, but you'll pay the full price at the pharmacy. These costs won't count toward your deductible or out-of-pocket maximum.

Instead, ask your doctor's office to contact us to start a coverage review.

Q. What happens if I try to fill a prescription that has a quantity limit?
A. Your pharmacist will only fill the amount your plan allows. If you need more than what's covered, your doctor's office can ask us to review whether more can be approved.

Q. Are all of the medications on this drug list approved by the FDA?
A. Yes.

Your questions, answered. *(cont.)*

Q. Does my plan cover medications that the FDA recently approved?
A. We review new medications, supplies, and devices to decide if they should be covered and how they'll be covered. This can take up to six months after the FDA approves them.

If your doctor wants you to use a newly approved medication, they can ask us to review whether it can be covered.

Q. What are preventive medications?
A. They help lower your risk of getting certain long-term health conditions and help you stay healthy. These include conditions like asthma, depression, diabetes, heart attack, high blood pressure, high cholesterol, osteoporosis (a disease that weakens bones), prenatal nutrient deficiency (when a pregnant person doesn't get enough nutrients), and stroke.

Q. Which medications are covered under the health care reform law?
A. Under the Patient Protection and Affordable Care Act (PPACA), also known as "health care reform," your plan covers certain preventive medications and over-the-counter (OTC) products at no cost to you – no copay, coinsurance, or deductible.

To see a list of $0 medications, go to **Cigna.com/PDL**. Click the dropdown next to "Drug Lists for Employer Plans." Under Preventive Drug Lists, select the PPACA No Cost-Share Preventive Drug List.

Q. How can I find out how much my medication will cost?
A. When you and your doctor are choosing a medication, it helps to know what it will cost ahead of time. Log in to the myCigna app or **myCigna.com** and use the Price a Medication tool. You can see your costs at in-network pharmacies and check for lower-cost options.[5]

Q. What's a cost-share?
A. It's the amount you pay out of pocket for a covered prescription or health care service – like a copay, coinsurance, or deductible.

Q. How can I save money on my prescription medications?
A. You may be able to save money by switching to a lower-cost medication, like a generic, or by getting a 90-day supply (if your plan allows). Talk to your doctor about what may work best for you.

Q. What's a generic medication?
A. Generics work the same as brand-name medications and provide the same health benefits – usually at a lower cost.[3] They have the same active ingredient, strength, and form (like a tablet or capsule). Generics are usually sold under their chemical or scientific name instead of the brand name.

Q. Do generics work the same as brand-name medications?
A. Yes. Generics work the same as brand-name medications and provide the same health benefits.[3]

Q. What are the differences between generic and brand-name medications?
A. Generics and brand-name medications may:[3]

- Look different – they may come in a different shape, size, or color
- Come in different flavors
- Have different inactive ingredients or preservatives (ingredients that help keep the medication fresh)
- Come in different packaging or have different labeling

These small differences don't change how well the generic works.

Q. What is a "biosimilar" medication?
A. Biosimilars are medications that are very similar to a medication the FDA has already approved. They have no meaningful differences in safety, how well they work, or how they're given – and they usually cost less.[6]

Your questions, answered. *(cont.)*

Q. My pharmacy isn't in my plan's network. Can I continue to fill my prescriptions there?
A. You'll usually pay less if you use a pharmacy in your network. If you go out of network, you may pay more – or your medication may not be covered at all. Log in to the myCigna app or **myCigna.com** to find pharmacies in your network.

Q. Can I fill my prescriptions by mail?
A. Yes, as long as your plan offers home delivery.[7]

Home delivery with Express Scripts® Pharmacy

A simple, safe way to get medications you take regularly – without trips to the pharmacy. To learn more, go to **Cigna.com/homedelivery**.

With home delivery, you can:

- Order, manage, track, and pay for your medications online or on your phone
- Get standard shipping at no extra cost[8]
- Get up to a 90-day supply at one time
- Talk to a pharmacist 24/7
- Sign up for automatic refills or refill reminders[9]
- Use a payment plan, if needed

Accredo® Specialty Pharmacy

Accredo supports people who take specialty medications for rare or complex conditions. To learn more, go to **Cigna.com/specialty**.

With Accredo, you can:

- Talk to a specially trained pharmacist or nurse 24/7
- Learn how to manage side effects
- Find help paying for your medication, if needed
- Get fast shipping at no extra cost[8]
- Sign up for refills and reminders
- Manage your medications and track orders online

Q. How do I get started using home delivery?
A. You can get started in two ways – choose what works best for you:

1. **Online.** Log in to the myCigna app or **myCigna.com**. Go to Prescriptions, select My Medications, and choose the option to move your prescription to home delivery.
2. **By phone.**
   - Call your doctor's office. Ask them to send a 90-day prescription (with refills) to Express Scripts home delivery or
   - Call Express Scripts Pharmacy at **800.835.3784** and ask them to get your prescription from your doctor. Have your ID card, doctor's contact information, and medication name(s) ready when you call.

Q. How do I get started using Accredo?
A. Call **877.826.7657**, Monday–Friday, 7:00 am–10:00 pm CST or Saturday, 7:00 am–4:00 pm CST. They'll work with your doctor's office to get your prescription, review your coverage, and set up delivery.

Q. Where can I find more information about my pharmacy benefits?
A. Log in to the myCigna app or **myCigna.com** to learn more about your pharmacy coverage. You can check medication costs, find lower-cost options, see what's covered, find in-network pharmacies, ask a pharmacist questions, and view your claims. You can also manage your home delivery orders.[7]

Exclusions and limitations for coverage.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and be medically necessary. If your plan provides coverage for certain preventive prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, the prescription may not be covered. Certain drugs may require prior authorization, or be subject to step therapy, quantity limits or other utilization management requirements.

Plans generally do not provide coverage for the following under the pharmacy benefit, except as required by state or federal law, or by the terms of your specific plan:[10]

- Over-the-counter (OTC) medicines (those that do not require a prescription) except insulin unless state or federal law requires coverage of such medicines.
- Prescription medications or supplies for which there is a prescription or OTC therapeutic equivalent or therapeutic alternative.
- Doctor-administered injectable medications covered under the Plan's medical benefit, unless otherwise covered under the Plan's prescription drug list or approved by Cigna Healthcare.
- Implantable contraceptive devices covered under the Plan's medical benefit.
- Medications that are not medically necessary.
- Experimental or investigational medications, including U.S. Food and Drug Administration (FDA)-approved medications used for purposes other than those approved by the FDA unless the medication is recognized for the treatment of the particular indication.
- Medications that are not approved by the FDA.
- Prescription and non-prescription devices, supplies, and appliances other than those supplies specifically listed as covered.
- Medications used for fertility,[11] sexual dysfunction, cosmetic purposes, weight loss, smoking cessation,[11] or athletic enhancement.
- Prescription vitamins (other than prenatal vitamins) or dietary supplements unless state or federal law requires coverage of such products.
- Immunization agents, biological products for allergy immunization, biological sera, blood, blood plasma and other blood products or fractions and medications used for travel prophylaxis.
- Replacement of prescription medications and related supplies due to loss or theft.
- Medications which are to be taken by or administered to a covered person while they are a patient in a licensed hospital, skilled nursing facility, rest home or similar institution which operates on its premises or allows to be operated on its premises a facility for dispensing pharmaceuticals.
- Prescriptions more than one year from the date of issue.
- Coverage for prescription medication products for the amount dispensed (days' supply) which is more than the applicable supply limit, or is less than any applicable supply minimum set forth in The Schedule, or which is more than the quantity limit(s) or dosage limit(s) set by the P&T Committee.
- More than one prescription order or refill for a given prescription supply period for the same prescription medication product prescribed by one or more doctors and dispensed by one or more pharmacies.
- Prescription medication products dispensed outside the jurisdiction of the United States, except as required for emergency or urgent care treatment.

In addition to the plan's standard pharmacy exclusions, certain new FDA-approved medication products (including, but not limited to, medications, medical supplies or devices that are covered under standard pharmacy benefit plans) may not be covered for the first six months of market availability unless approved by Cigna Healthcare as medically necessary.

Cigna Healthcare reserves the right to make changes to the drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna Healthcare does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna Healthcare may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna Healthcare. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the U.S. Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.

1. App/online store terms and mobile phone carrier/data charges apply.
2. **For insured plans that must follow Delaware's state insurance laws:** Brand-name antidepressants, smoking cessation, attention deficit hyperactivity disorder (ADHD) and anti-psychotic medications that don't have a generic equivalent available will be covered as Tier 2 (preferred brand). This is true even if the medication is listed as Tier 3 (non-preferred brand) on your plan's drug list. To find out how your specific plans covers these medications, log in to the myCigna app or myCigna.com, or call the number on your ID card.
3. U.S. Food and Drug Administration (FDA) website, "Generic Drugs: Questions & Answers." Last updated 06/08/26. fda.gov/drugs/generic-drugs/generic-drugs-questions-answers#2.
4. Quit smoking medications aren't usually covered, except as required by law or by the terms of your specific plan. Costs and complete details of the plan's prescription drug coverage, including a full list of exclusions and limitations, are set forth in the plan documents. If there are any differences between the information provided here and the plan documents, the information in the plan documents takes complete precedence.
5. Prices shown on myCigna are not guaranteed and coverage is subject to your plan terms and conditions. Visit myCigna for more information.
6. U.S. Food and Drug Administration (FDA) website, "Biosimilar Basics for Patients." Last updated 08/01/24. fda.gov/drugs/biosimilars/biosimilars-basics-patients.
7. Not all plans offer Express Scripts Pharmacy and Accredo Specialty Pharmacy as covered pharmacy options. Log in to the myCigna app or myCigna.com, or check your plan details, to learn more about the pharmacies in your plan's network. Cigna Healthcare, Evernorth Health Services, Express Scripts Pharmacy, and Accredo are all part of The Cigna Group. This means we have an ownership interest in Express Scripts Pharmacy's home delivery services and Accredo's specialty pharmacy services — but you have the right to fill prescriptions at any pharmacy in your network (as your plan allows). Log in to the myCigna app or myCigna.com to see all of your in-network options.
8. Your plan pays the cost for standard shipping.
9. Express Scripts Pharmacy can automatically refill certain medications. Log in to the myCigna App or myCigna.com or call 800.835.3784 to sign up. You can sign up to get emails and/or texts from Express Scripts Pharmacy. To get text messages, you'll have to sign up for the Express Scripts texting service. You can do this online or over the phone. Once you sign up, simply reply to their welcome text to get started. Standard text messaging rates apply.
10. Costs and complete details of the plan's prescription drug coverage are set forth in the plan documents. If there are any differences between the information provided here and the plan documents, the information in the plan documents takes complete precedence.
11. **For plans that must follow state insurance laws, such as Delaware:** Your plan may provide coverage for infertility medications and smoking cessation medications even if this drug list states that your plan may not cover them. To find out if your specific plan covers these medications, log in to the myCigna app or myCigna.com, or check your plan materials.
